## About The Authors

### Calvin Woon

Calvin Woon has been marketing actively online for close to two years now and has tasted sweet success in the niches he's targeted.

He is highly dedicated to help new marketers begin and profit from their own online business. And he has been providing new marketers with his easy to understand and step-by-step strategies since 2006.

Check out Calvin's personal blog at [www.CalvinWoon.com](http://www.CalvinWoon.com)

### Jonathan Teng

Jonathan Teng has been marketing full time online since 2005 and has been enjoying huge success online.

Despite staying in a country (Mauritius) where internet marketing is rarely heard of, he has defied all odds and carved out a name for himself in this highly competitive industry.

He owns more than 50 websites online in a huge range of niches and each site generates a decent income for him.

He recently launched his best-selling product Content Infinity which is a Clickbank best seller and has received sterling reviews from other marketers. Check out Content Infinity here

> > <http://www.contentinfinity.com/>

## **Basic Introduction to Private Label Rights**

Would you believe a person if they told you that it was possible to take another person's work, change it anyway you please and call the edited material your own?

What if that person also told you that besides being able to do so, you could actually profit from that work and not be liable for any copyright infringement?

If you haven't heard of Private Label Rights, then most likely you'd think they were pulling your leg. But it's true!

Private Label Rights do exist and they are one of the fastest ways to creating and owning your own products available!

But what are Private Label Rights?

To understand why Private Label Rights are so special, first you need to know a little bit about resell and master resell rights.

### **Basic Resell Rights**

Resell rights are simply permission from the owner of a product (an e-book, for example) to allow you to take and sell or distribute it for your own profit.

### **Master Resell Rights**

Master resell rights take it a step further and allow you to sell the resell rights to the product. Buying a set of these rights is great but it can cost you and the downside is that although you get to keep the initial profits, in all essence

all you are really doing is helping to build the product creators business and reputation.

So, let's just say that resell rights are great for a quick profit but if you really want to build your own brand and business you need your own product not someone else's!

Now enters our hero.....

## **Private Label Rights (PLR)**

These are products that you are allowed to put your name on as the author and sell as your own product. That's right, with PLR's you are actually given permission to sign and even change another person's work depending on the type of PLR that you purchase.

But note, not all PLR are the same as the owner might impose some restrictions. So it's vital that you read the terms and conditions carefully.

The best of all PLR would be unrestricted private label rights. That means you can do anything you want with the product.

Why is that so great?

Because, it is the fastest way to creating your own product that there is and it's a reason to get really excited.

Now you can almost instantly have a product of your very own.

One that will promote your business, build your brand and make you all of the long term profits.

## Instant PLR Profits

Let's take a minute and get familiar with PLR's.

Most of the time with basic private label rights you can't change the product. However you can put your name on it and claim authorship. These you can usually pick up very inexpensively or free.

Then there are private label rights that come with source code rights. These products come to you in the raw source material like MS Word or text files. They are usually like a rough draft so that you can use it to complete a finished product that you can call your own.

These will usually cost you a bit more and can come with a wide variety of terms and conditions that are set by the creator of the content.

With PLR content, you no longer need to divert your time, effort and attention to writing your own content, nor do you have to hire expensive freelance writers to write it for you.

In short....

It drastically cuts the cost and effort required in outsourcing content. Private label content allows you to use solid copy created by a qualified writer at dirt cheap prices to your advantage. This way, you can devote your energies to doing what you do best and put the power of PLR content to work for you at the same time.

## **Here is a quick list of the perks that come with PLR's**

- Saves you time, effort and aggravation.
- Let's you build your brand.
- Helps you build your business and reputation.
- You keep all of the credit.
- You keep all of the profits.
- Saves you a ton of money.
- Gives you editorial freedom.
- Provides you with professional results.

And that's just a few of the reasons that you should be head over heels for PLR products.

### ***Here are the common kinds of PLR products:***

- Articles
- eBooks
- Software
- Newsletter content
- Graphics
- Mini sites templates
- And many others...

## **Pros and Cons of Working with PLR**

As we learned earlier in the course a PLR product with full rights goes much further than a product with resell rights.

Because with PLRs you have the rights to do basically what ever you want with the content. And this gives you the benefit of having your very own product without investing the time and effort of making it yourself.

For instance....

Having full PLR's to a batch of articles, you are allowed to do any editing that you want. Plus, you can incorporate any links, images or additional content then include your author byline and claim the work as your own.

PLR materials come in many shapes sizes and forms including information products such as e-books, reports and articles. They also come as graphic files, software, and more.

### **Does PLR have Disadvantages?**

The only downside of PLR content is that when you purchase it you are not guaranteed a unique product, since they are often sold to several individuals.

Of course, you can always hire someone to create the content just for you. But it can be a bit pricey nonetheless. Not to say it's not worth it, but I'm sure you have better ways to spend your hard earned cash.

**Now let's go over the major Advantages of PLR content.**

- **It saves time.** For a well researched, informative and good quality article to be written, containing several chapters and comprising of about fifty pages, it can very well take at least fifty hours of your time and effort. With PLR contents, you easily get instant content access.
- **No "outbound links".** With PLR content, you are not obligated to incorporate "outbound links" in your product. This means you can choose to only promoting your business or affiliate programs inside these products.
- **Cost efficient.** Hiring someone to write content for you can be expensive, costing around \$17 per 400 to 700 words. If you need a 50 page report or e-book, then you can expect to pay around \$850. On the other hand, PLR content is much less expensive.
- **PLR content can be revised or altered.** You can rephrase the words and add in your preferred content, links and keywords.
- **You can brand your own name.** Almost anybody purchasing something prefers to buy from someone they trust and know. With your PLR content, you are able to display your name. Then when prospects are pointed to your site, seeing your name once more, they instinctively have that certain feeling of knowing and trusting you.
- **Well written by experts.** Generally, almost all "private label content" is professionally written and compiled with the most up-to-date research by experienced writers.

As you can see there are many more advantages than disadvantages to using PLR content to create your own products. I hope by now, you do have some insights and ideas that you can use when using your PLR content.

So now let's move on to...

### **Where to Find PLR Products**

There are many sources to hunt for quality PLR products, with both free and paid sources. Of course, you get what you pay for. Although some PLR membership sites do cost quite a little, the quality that they provide will well ensure that you'll be able to recoup back your investment many times over.

On the other hand, there are some hidden gems in free PLR products as well. Just have to keep searching.

Here are some of the places you can look to find PLR products:

#### **PLR Wholesaler**

An excellent membership site where you can get all the latest resell rights & PLR products. Best of all, the membership is FREE! Though I would highly recommend you take up the upgraded membership.

#### **Niches In a Box**

Great Resource. Been online forever ☺ 2 Great Products in the Rough each month that you can work on to call your own!

### **Private Label Gold**

This is a product of Edmund Loh, who is known as the PLR extraordinaire because of his ability of creating top grade PLR products. Private Label Gold is truly an excellent collection of private label rights products.

### **Giveaways**

Giveaways are a good source of PLR products as well.

You can find the latest giveaways [here](#)

## **Things You Can Do With PLR Products**

Here's one quick tip with PLR products: Always check out the license terms before you buy!

There is nothing worse than getting all excited about all of the different ways that you can use a product you just bought, only to reading the license and find out you can't use it the way that you had planed to.

We will now go over some of the things that you can do with PLR's that you are allowed to edit. These are the ones that hold the most potential.

Let's jump right in!

Say you were able to acquire PLR for a particular e-book. What can you do with it?

For starters, you can customize it with your name and contact information and start selling it. That is the fastest way to get going. But, it is only one way.

## Instant PLR Profits

Next you can break up the book into separate chapters and then submit or sell these as articles.

On the other hand, if you were able to acquire PLR for a set of articles, you could combine them and package it as a book, which you then can sell.

OK, you've done that, now get busy and start changing the material's content by adding or removing details. You can also add pictures or illustrations as well as other media like sound or video clips. The sky is the limit.

Then you can use the same content to create short reports, follow up emails, marketing materials, website content or anything else you can think.

Did you know that.....

It is entirely possible to come up with a whole new set of products from a single material source and we are going to cover some more great ideas now...

## **10 Ideas & Suggestions with Using PLR**

### ***PLR Idea #1 Create Websites and Blogs***

This is probably one of the more obvious techniques to use with a digital folder of PLR articles. You can use Wordpress to setup a blog, and automatically post 1 article every few days.

With this technique alone, you can easily bring in a few bucks a day from Google Adsense. You can also promote other affiliate products on your blog which will increase your profits substantially.

True, a few bucks a day may not seem exciting for some, but the idea here is to create multiple niche blogs. Remember, you can also outsource the posting of articles on your blog. Hence, it's really autopilot income if you do it right.

Want a simple step by step guide on creating a ton of money making niche blogs?

Check out Super Affiliate Blogger [here](#).

### ***PLR Idea #2 Create a Report or Ebook***

If you have any PLR eBooks or reports, you can easily create your very own eBooks to sell for instant profits. PLR eBooks will come with the source files which usually come in the form of Microsoft Word format.

Hence, you can easily edit the content, change the title, value add to it and also include your name as the author name.

You should also change the graphics and sales page to make it unique. In short, you should give the product a totally fresh look so that it's unique to your own.

[www.IMBuzzCreators.com](http://www.IMBuzzCreators.com)

## Instant PLR Profits

This is one thing which most people do not do enough, which makes the PLR products they are trying to sell unprofitable as there are many people selling the same thing.

You can use [Open Office](#) to convert your word file into a PDF file.

In fact, you can even create a niche eBook in just a few hours from PLR articles and then turn around and sell it for \$17.

This technique is more time consuming, but it pays much better depending on how much time you're willing to put into it. A few hours can get you a \$17 short report, but spending a few weeks and putting a little money into it can get you a \$97 ebook to sell.

Next, you need to register a domain name at [Namecheap](#).

If you do not have a hosting account yet, sign up for one at [HostGator](#). This is extremely reliable and affordable. So check it out [here](#).

Do not wish to pay for webhosting?

Alternatively, you can sign up for a free webhosting account at [000webhost](#). We've not personally used it, but according to reviews we've read, it seems pretty good. Anyway, it's free so might as well give it a try [here](#).

To accept payment, you can use [Paypal](#) and sign up for a Premier or Business account which gives you more options and flexibility. It's free and easy to set up. Just follow the instructions given on the site.

Sign up for a Paypal account if you do not have one [here](#).

[www.IMBuzzCreators.com](http://www.IMBuzzCreators.com)

### ***PLR Idea #3 Newsletter or E-course***

Need content for your newsletter list? PLR articles can be the perfect answer. Of course, if you're developing a relationship with your readers, you will want to rewrite them a little to match your own writing style (you don't want to sound like you copied and pasted PLR content into your newsletter which won't reflect well on you).

However, you can pull a section from a PLR article – use it as inspiration -- and whip out a newsletter in minutes.

Or split up or combine some articles into a 5-part e-Course. That way, your subscribers will never go hungry for fresh and useful content!

### ***PLR Idea #4 Article Marketing***

You can submit your re-written PLR articles to article directories like [www.ezinearticles.com](http://www.ezinearticles.com) or [www.goarticles.com](http://www.goarticles.com). You can then make use of your resource box (basically your biography) to include a link back to your websites.

This is the best way to jump start traffic and gain backlinks for a site. And you can direct your readers to your own squeeze page and build a targeted opt-in list.

For a step-by-step article marketing guide, you can check out Bum Marketing Secrets [here](#).

To research and find fresh idea for your articles, check out Jonathan's [Content Infinity](#).

### ***PLR Idea #5 Podcasting/Audio***

Creating an audio version of an ebook is the easiest way to double or triple the value of your product. Customers can listen to your audio book at their own convenience on their MP3 players while they're driving or exercising.

Podcasts are also "blogs on steroids". Once you have a blog and it's set up with an RSS feed, you just add audio, and voila! You've got a podcast.

Take a PLR article or report and use it as inspiration for a podcast. You can either read a section of your PLR or use it simply as inspiration for generating your own ideas and discussion in a podcast.

### ***PLR Idea #6 The One Time Offer***

Use PLR products (or a group of products) to create a one time offer. If you're selling an inexpensive report, you can throw in a one time offer for a similar product for double or triple the price of the report. You can easily double or triple your profits just by adding a simple OTO.

If you would like to set up ready made one time offers, check out OTO Goldmine [here](#).

### ***PLR Idea #7 Get Physical – DVDs, Books, Calenders, etc***

When you have high quality PLR products, it's possible to create a physical product that you can sell for well over \$100. Start off simple by burning the DVD yourself with your home DVD burner and printing labels with your printer.

You can even convert it into a physical hard copy book if you want.

### ***PLR Idea #8 Provide a daily gift***

This one is fun and profitable! What you do is gather enough PLR products that you have unlimited rights to, or PLR products that you've had created for you only. And provide your subscribers with one PLR product each day as a daily gift. You can even set up a site specially for this purpose and even charge customers for receiving a surprise daily gift from you!

### ***PLR Technique #9 Squidoo***

With Squidoo you can create what's called a lens (think one page blog type thing) hence, you can add PLR articles to the lens, point a link to your niche blog or affiliate products, and work on improving your lens rank to get seen by more users.

Check out Squidoo [here](#).

### ***PLR Technique #10 Affiliate Marketing***

For people who are new to affiliate marketing, it basically refers to selling other people's products and earning a pre-determined commission fee for every sale you make.

You can search [Clickbank](#) for products that are directly related to your PLR products. If you have PLR articles related to the dating niche, just search for dating products on [Clickbank](#). Now you instantly have content to create a mini site or niche blog to sell the Clickbank product!

For a complete affiliate marketing guide, you can check out [Super Affiliates](#).

By now, you should have enough ideas and suggestions on how you can make use of your PLR products!

So now let's move on to exactly how you can make money with Private Label Rights products.

### **How to Transform PLR Products Into Instant Cash**

PLR Content is one of the easiest ways to build a business especially if you don't have the time to develop your own product. There are literally hundreds of possibilities when it comes to how you can make money with it.

All you have to do is find the right material to work with and "BAM" you can have an instant product. Just change the graphics, modify the content and you are good to go.

Another great thing about this is that you can package the content and present it to buyers in any way that you want. Additionally, you get all of the glory because you've bought the right to put your name on product and call it your own.

Let's take an e-book, for example. If an author of an e-book grants you the Private Label Rights to a book about "Ipods", you can modify the content to include the latest developments on Ipods, like software updates, new advancements or accessories.

You can add features and create helpful sub-topics that would best fit the current trends in Ipod technology. After you have made your changes, you can claim rights to the e-book and use it however you see fit.

## Instant PLR Profits

So you see, the idea may have been copied or bought, but you now have the right to sell the "new" product as your own, which is a huge benefit to your business indeed.

In a basic business course, you are taught to develop an original product which will "sell" to a particular market.

However, developing and manufacturing your own product is quite tedious and a very time consuming process.

With PLR Content you completely skip that step and begin to promote and profit from your own product.

You can do this in several ways.....

- You can give the new product away to attract more visitors to your site.
- You can sell the newly created product and keep the profits.
- You can use the product as a bonus to add value to another product.
- You can sell the resell, master resell and the private label rights for your new product.
- You can also build a web site for your product and recruit other sites to advertise your products for you.

And it doesn't have to stop there, because as times change and new information and technology becomes available you can update your product, give it new life and sell it all over again!

Are you getting some great ideas? I sure hope so!

With a little creativity, resourcefulness and effort, you can earn hundreds of dollars by using Private Label Rights to come up with original products that you can distribute to your target market.

Alright, now let's move on to more specific strategies for the various PLR content.

### **How you can profit with private label articles**

Not a lot of people know about the PLR articles, much less why they should pay attention to them. Give yourself the edge and find out how you can profit from them in the most efficient and effective way possible.

With one set of PLR articles and some creativity on your part, you can extend the life of the articles to the point where the content has more than paid for itself.

Here are some quick and easy ways that you can edit and use PLR articles to your advantage.

- Change the title of the article. If you are using keyword optimized articles, make sure you keep the keyword in the title.
- Change the opening paragraph. How can you say the same thing in a different way?
- Go through the article. Add or subtract a sentence or two. Present the information in a different order. Expand on certain points. Get creative and add your own flair.

## Instant PLR Profits

- Rewrite the ending. When you do this, think about what you want the reader to do.

After you have edited the articles to make them your own, you can use them to;

- Compile a short report.

Consolidate a series of articles of a similar topic and package them as a report. While you may think that anyone can do this, you'd be surprised how little of this is done.

Many people don't have the time to read or the willingness to read several articles at different times. Providing them a simplified version of the information they want will be a welcome offer for your visitors. You can either give away the report for free, sell it as your own product or use it as content on your website.

- Create a series of emails.

This is especially useful when producing material for an email campaign. A series is by far, one of the more effective ways to create a following with your audience.

Give enough to allow them a feel for what you're offering and hint at giving more of the same if they will subscribe to your mailing list. In turn, your emails promote your website by inviting them to visit you on a more regular basis.

- Create an e-book.

It is very easy for you to take a set of PLR articles and compile them into an e-book, for which you are the author. Since you have created an entirely new product you can package it and sell with resell rights.

As you can see, using PLR articles are not only effective in providing truly useful content. They are also time and cost effective.

## **How to Profit with Private Label E-books**

Let's start with PLR e-books

Generally PLR e-books that are being sold are specially commissioned and written by ghostwriters. These e-books are usually geared to a specific market. This is great for you because you can easily find professionally written eBooks that will fit into the theme and budget of your business.

There are a lot of things that you can do to maximize a private label eBook, so that you can get the most for your money.

I know we covered a good bit about editing PLR content in earlier on. So we won't delve too deep into the editing part of e-books today but there are a few more things that I would like to go over with you.

First off I want to make sure that you know with a little bit of editing and ingenuity you can quickly end up offering an e-book to your customers that they will not find elsewhere.

This is great for many reasons. One of them is that you will NOT have to compete with other a hundred other resellers who all have the same product. In other words you will have "NO COMPETITION". This alone is worth the cost of the content.

Seriously it's the fastest way to get to the head of the line.

As with the private label articles we spoke of earlier, the contents of the book can be modified to suit your target market.

Chapters can be rearranged. New sections can be added. Titles can be modified. New pictures, ecovers and site graphics can be used. This is the part where you can get really creative and put your own unique spin on the content to make it stand out from the crowd.

To learn how you can churn out quality graphics on your own, check out **here**.

Just imagine after making some simple changes you will have created an entirely new and unique version that you can offer to your customers. And it's one with your name on it that will promote your products, your affiliate programs and make you all of the profits.

## **How to Profit with Private Label Software**

The same holds true for private label software.

The core technology of the product can be created by another person or company, but when you purchase the private label rights you will have the ability to place your own name and brand on the software.

With most PLR software you will be able to change the layout, color schemes, logos among other options that to make the software look like it was created by you. How great is that.

You can be a software designer and you never have to write a line of code!

The only drawback with PLR software is that unless you are technically inclined you may have to hire someone to make the modifications for you. But don't let that stop you. Most of the time you can hire someone from Elance.com or

[www.IMBuzzCreators.com](http://www.IMBuzzCreators.com)

Rent-a-coder.com to do the job inexpensively.

There is a great market for software and a savvy marketer can profit greatly from PLR software just make sure you check out the product thoroughly and you know what you are getting for your investment.

Would you like to obtain a huge arsenal of software which you can rebrand to your own name and sell it like it's your own product?

Check it out here: <http://www.IMBuzzSoftware.com>

## **How to Maximize Your PLR Profits**

Now let's take a look at the different ways that you can maximum your private label products and squeeze every bit of profits out of them that you can.

Often when someone buys the private label rights to a product they use it once to create a new version of the product, then they tuck it away or delete it and never use it again.

I think that is one of the biggest wastes of good content there is. If you've spent good money on great content use it until you can't find a way to use it any more!

You can take the same exact content and use it in so many different ways that it will make your head spin. Let's go over some of the things that you can do with the exact same content.

First we'll start with the obvious things like:

## Instant PLR Profits

Creating and editing articles.....

If you have a set of articles take them and edit them so that they are slightly different from the original. Just change a few words, add in your own opening or closing. Simple is the key to your first edit.

Then take them and chop them up into paragraphs. Use the individual blocks of text and mix and match them so that you can create a whole new article.

Now break them up in to tips, signature lines and even ad copy, such as solo ads, small classified or three line Google ads.

Are you getting any good ideas?

Now just imagine, if you can do that much with simple articles, you can do even more with e-books and reports not to mention graphics and software. The possible combinations are endless.

So whatever you do don't just stop after you've made one revision.

Use the same process with any PLR content and I guarantee you will get more than ten times the amount of your investment back.

I know that we have gone over this before, but I'm going to list for you one more time some of the fantastic uses for PLR content.

Instant site content.

Submit it to directories.

Publish it in newsletters.

Exchange it.

Let your visitors publish it with your byline.

Gain link popularity with it.

[www.IMBuzzCreators.com](http://www.IMBuzzCreators.com)

## Instant PLR Profits

Make different versions of it.

Give it away.

Sell it.

Sell the resell rights to it.

Sell the master resell rights to it.

Sell the private label rights to it.

Make multiple versions of it.

Build your opt-in list with it.

Increase value with it.

Create original articles with it.

Create original e-books with it.

Create original reports with it.

Create original tips and sig files with it.

Create original articles with it.

Create original ad copy with it.

Increase your profits with it.

Start your own affiliate program with it.

Use it to make promotional content for your new affiliates.

### **Here are a few more advanced ideas:**

Make audio versions of it.

Make a video out of it using it as a script.

Make video screen casts with it.

Make power point slide shows with it.

Put it on a CD and use it as an up sell.

Here is one more tip that I hope will save you loads of time and trouble.

Create a special folder on your desktop and whenever you purchase PLR products tuck it in that folder. That way when you are on the hunt for a chunk of content

for a project you can easily search that folder by keyword and find exactly what you are looking for without rummaging around on your hard drive for hours!

**Check out PLR Dashboard** available from <http://www.plrdashboard.com> to keep all your PLR products and memberships organized. This is free.

## **Final Advanced Tips With Profiting With PLR**

### **1. Always brand the products to your name**

If you do not brand the PLR products to your name, you're simply missing out on the full benefits of PLR. In order to be successful in internet marketing, it's vital that you gain the maximum exposure for yourself and establish a brand.

Hence, by simply putting your name on the products gives you the much needed exposure and credibility. Not doing so is simply being foolish.

### **2. Always insert your own website links or affiliate links in your PLR reports/eBooks**

Of course after putting your name on the product, you should freely promote your website links. This serves as a form of free advertising and can help generate traffic/sales to your other websites/products.

Additionally, you can earn some extra affiliate commissions by inserting affiliate promotions in the form of your affiliate links.

### **3. Monetize your thank you pages!**

## Instant PLR Profits

Yes that's right. You can also edit your thank you pages that come with your PLR package to either promote your other products or affiliate products.

#### **4. Always value add to your content to make it stand out**

This point cannot be emphasized enough. Do not simply resell the PLR as it came originally. Always add new and fresh content or rewrite the original one. This will differentiate you from the average marketers.

Think about it, if there are a thousand competitors out there who are selling the same exact product, you're going to find it extremely difficult to make any decent sales.

So always be sure to change the sales copy, order new graphics if possible and also value add by including some related bonuses.

Here's a source for affordable graphics if you like:

[EcoverGeeks](#)

#### **5. Set up a membership site offering PLR products**

If you're an avid collector of PLR products and have a ton of them, why not set up a membership site offering PLR products?

Just charge members a fee to download new PLR products each month. Of course, you won't be the only ones doing this. So it helps if you rework the PLR that you have.

Of course, you can also develop your own unique PLR products and sell them.

For a really affordable membership script solution, check out [Member Fire Script](#).

## **Conclusion:**

Alright, you now have what it takes to generate a ton of profits with private label rights products. All you need to do now is to start taking massive action!

We really look forward to hearing to your success stories. If you like our report, do send us a testimonial at <http://www.imbuzzsupport.com>!

IM Buzz Creators

## **Make Instant Cash With This Report!**

You can easily make some INSTANT cash – in minutes. You get paid 100% commissions instantly into your paypal account for every sale you generate. Because of the low price, it sells very well! You can easily make back your investment 10, 100 or even 1000 times!

Making money with this report is very easy! Just signup for your special JV Link here: (use JV code = plrprofits)

<http://www.imbuzzebbooks.com/plrprofits/jv.php>

And whenever someone clicks and buys from your link, you pocket the full \$7 – no strings attached. The money goes directly to your Paypal account.

If you wish to make money online, having a Paypal account is essential as many of the affiliate programs pays out commissions via Paypal. The best thing is, it's free! And you do not have to wait for months to clear as you can withdraw funds into your bank within a few days.

So if you do not have a Paypal account, you can sign up for a FREE account [here](#).

If you wish to cloak your affiliate link, download our Cloaker Buzz software [here](#). Read the readme file if you're unsure on how to use it.

You can get started right away. You will be making money in no time!

To your massive success,

Calvin & Jonathan
