# "TOP SECRET" Method Produces Income sites in 30 Minutes or LESS!!!

I'm going to show you how you can build a revenue generating eBay & Adsense store, in less than 30 minutes, with "FREE" software available online. That's right, a income producing, TOTALLY "FREE" eBay store for "FREE." Ok, turn off your skeptic button, you can build a "professional" looking site in less than 30 minutes, with "FREE" software that's readily available, and I'm going to show you how.

First, here are a few sites I've produced with this software, just to give you an idea how professional these sites can look:

```
http://hotcorvettestore.com/
```

http://harleydyna.net/

```
http://macbooknotebook.com/
```

```
http://www.911porsche.us/
```

These are just a few sites I've built using these "little" known secrets. They must be "SECRETS" because very few people are using these techniques, at least I haven't found very many.

```
HOW can WE DO THIS?
```

It's really quite simple; just take the web's #1 blogging software, and turn it into an "INCOME" generating powerhouse. That's right "FREE" software that you can use to generate income from eBay & Adsense. The "FREE" software is WordPress.

Now before you "freak" out, I'm going to show you an absolute easy way to install this software, add a "professional" looking template, and then combine the site with a "TOTALLY FREE" WordPress plugin, that will attract "TON'S" of visitors to your site(s). Yes I said sites, because as quickly as you can say

"Supercalafragalisticexpialladocious" you can build "many" professional looking sites. What build more than one "CA\$H" generating site? Come on Guy, what are

you smokin'? It's ABSOLUTELY "TRUE"!!! And if I was smokin', I wouldn't tell you.....

Want an immediate income stream? How about producing a few of these "Gems" and then flip them for a "quick" profit? That's what I do on a daily basis. You can earn a quick \$100, \$200, or more, with one of these "CA\$H" producing sites.

Here's a shot of my Paypal account recent activity....Obviously the larger amounts are website sales:

#### Ok, OK, Let's get STARTED!!!

Before we install WordPress let's determine what products our eBay Niche store will include. A good start is eBay's Hot List, a listing of current products that are selling like "hot" cakes.

We can see the numero uno item is the Apple iPhone. Let's build an Apple iPhone store, shall we??

We'll need to find a "FREE" theme for our store, since the default WordPress theme is, well "DEFAULT" nuff said. Let's search Google for "Free WordPress Theme(s)." As you can see, there are thousands of hits returned for Wordpress themes. That's the "fantastic" thing about WordPress. There are literally thousands of themes to choose from, and most of them are "FREE." You can EASILY create a stable of these eBay Niche stores, and never spend a "dime" (except for hosting).

We've found a very professional looking theme:

Download the theme, and remember where you saved it. We're going to use it in a minute.....

We need one other piece of "FREE" Software, for our "FREE" CA\$H producing eBay site...This little plugin will pull the actual eBay auction feed's down from eBay, and display them on our site. Let's get this "FREE" software from this site: <u>http://www.wiredstudios.com/phpbay/phpbay-lite-wordpress-plugin-display-</u> <u>ebay-auctions-in-wordpress.html</u>...

Ok, we now have all of the "FREE" software we're going to need to install our eBay & Adsense CA\$H Machine....Let's git 'er DUN!!!

#### **INSTALLATION:**

We're going to do this the "EASY" Way, so forget about installing WordPress manually. If you'd like to do that, be my guest, but this tutorial is about producing an "INCOME" generating site in less than "30 Minutes."

First you'll need a good Hosting company. I recommend BlueHost or Hostgator. Login to the Control Panel and look for an icon named "Fantastico." That"s how we're going to install WordPress. Using Fantastico, you can quickly and easily install Wordpress in less than 5 minutes...

Now a window will open for the actual WordPress installation. You must "fill-in-the-blanks" here for the actual installation to occur. Make sure you define where you want your Wordpress installation to occur (which folder?)...

Ok, once you are satisfied with the information you have filled out, just click "INSTALL WORDPRESS"

Ok, now let's click on "Finish Installation." You mean we're done??? Well not quite, but wasn't that EASY???

Click on Finish installation to continue. Finish installation

Now the screen offer's us the option of sending our installation record to an email. I would "HIGHLY" recommend this option, since it will give us an "Electronic" trail backup to our installation. Just keep a copy of the email for future reference, you never know when it could come in handy....

Let's go to our "FREE" ftp program now, since we need to upload a couple of files to our site...You can find an excellent "FREE" ftp program In "FileZilla." Here's a link for the download: <u>http://filezilla-project.org/</u> Just put your Host, username, and password info in (the port should be 21), and do a Quickconnect...

Make sure you choose "public\_html" for the folder. If you make a mistake, no big deal, just delete and choose "public\_html." Remember the WordPress installation? You picked a folder to install WP into, and that's where we're going now....

### The folder for this demo is iphonedemo.....

All of the files in our installation folder, are from the WordPress automated installation earlier. Now during a manual install, you are required to make a database, link the database to WP, and a number of other things Fantastico does for us automatically. Really, isn't it "Fantastico?"

Now this tutorial doesn't include how to get the Adsense script, maybe I'll include that information in REV 2, but for now I'll assume you know how to retrieve the Adsense script.....Once you have the Adsense script, just click on the "box" with the "horizontal" lines on each "Text 1, 2, or 3" rectangle, and this is the box you'll get....Place your "Title" in the top frame (I picked Google Ad's for mine-clever heh???)....Now paste the Adsense script into the box....click on the "X" in the top right hand corner and the box will disappear to the "Sidebar." Rinse and Repeat for the other "Text" boxes you have.....Remember to "Save Changes"

Now let's view the site: <a href="http://lesswork.net/iphonedemo/">http://lesswork.net/iphonedemo/</a>

Look's pretty good to me......There are many more things you can do to "Customize" these Professional looking eBay & Adsense mini-sites, but that is outside the scope of this book....

BTW, if you want more control over your phpBay code then you'll want to invest in phpBay PRO.

# With phpBay Pro, you can ...

Earn revenue through Ebay's affiliate program using Commission Junction, Mediaplex or TradeDoubler.

Create targeted niche based stores or pages that cater to your web site visitors.

Add keyword rich Ebay items to your php based web site that encourage impulsive buys.

Add SEO value to your content that can potentially increase search engine rankings.

List auction items regionally from 14 different countries.

List items by postal code (zip code) for localized results.

List items from specific Ebay categories.

List items from specific sellers.

Listings displayed in language and currency of selected country.

Mask outgoing Ebay links.

Use SID tracking for third party software.

Have complete control over options to fine tune results that encourage your visitors to click.

I sincerely hope you enjoyed this eBook, and now "Git 'er DUN."
