Finally, we have based this information upon the recent policy changes made by eBay regarding digitally downloadable media products and the advice given by Brian Burke of eBay.com

Purchasers of this material are eligible for FREE Updates to this guide based on any future policy changes BY eBay beyond our control.

Introduction

This eBook has been written by Ray Johnson – professional Internet Marketer, Internet Business Mentor and owner of www.ray-johnson.co.uk

This guide has been put together for worldwide sales on [eBay](#) and the affiliate site [Clickbank](#)

Ray has written this guide to allow YOU to taste the thrill of making money online from the comfort of your own home, dispelling the myth that earning online is difficult to do!

This guide will show you with step by step pictures and fool-proof instructions how to successfully apply the NEW [eBay](#) changes, to allow you to sell information products in the form of eBooks – ON eBay, whilst building a list – WITHOUT being in breach of eBay policies.

It also shows you how to start building an online business using eBay as a traffic generation tool, ethically “stealing” eBay traffic, to build your own subscriber list away from eBay – for a business with longevity.

Part 2 of this fantastic revolution is coming real soon, so stay tuned – because as a buyer of this eBook, you automatically qualify for a HEAVILY DISCOUNTED follow up!

The eBay Classified Ad System

[eBay](#) has a classified ad network as part of their total eBay site. This feature has been around for a while but has recently been thrown into the spotlight due to eBay's new policy on digital downloadable products.

eBay mandated that as of Monday March 31, 2008 all products that are delivered in a digital download format can only be listed on eBay by using classified ads. Products that are delivered as digital downloads can be; eBooks, audio files and video files.

Here are the new rules in a nutshell, as quoted by Brian Burke of eBay.com in a recent workshop held on the eBay.com discussion boards. We quite literally spent hours in the forums discussing what WAS and WAS NOT CONFIRMED to be allowed by eBay – so you can 100% rest assured that this eBook is based on brand new and current procedures that you CAN follow.

Below you will see just one of the replies I got from Brian Burke, outlining EXACTLY what IS and what is NOT allowed under the new ruling on selling digital products on [eBay](#).

You cannot link to sites that offer products for sale from the Classified Ad.

Can there be a link to my website sales page? No.

Can there be a link to Clickbank? No.

Thanks.

Brian

Above:

eBay's Brian Burke advises us the CAN'S and CANT'S of the new eBay Classified Ad policy regarding digital products.

If you have sold eBooks on eBay in the past and want to continue to sell eBooks as a digital downloadable product then you have to learn how to use the NEW classified system.

If you have never sold eBooks on eBay but would like to sell eBooks as a digital downloadable product then you also have to learn to use the eBay classified ad listing process.

This guide will lead you through the complete process of using classified ads. You will learn how they are similar to regular eBay auctions. You will learn how they are different than eBay auctions. You will learn how to set them up, how to structure them; how to create attention grabbing ads and you will learn the various ways you can use these ads to sell your downloadable products and grow your mailing list.

So lets get stuck in...

What Is A Downloadable Product?

A downloadable product is any product that can be delivered to your customer in some digital fashion and does not have to be physically delivered to your the purchasing customer.

For example, if a customer purchases an eBook from you and you then email the product to them, that is considered a digital downloadable delivery. If you conclude the sale off eBay by providing your customer with a link where he or she can go to download the product themselves, that is also considered a digital downloadable product.

As of the writing of this guide, the policy that eBay has adopted is: if it is a physical product such as a CD or a DVD, then it can be sold like any other product on eBay. That means that if you burn your eBook to a CD and sell the CD, it is no longer considered a downloadable product and you can sell it through the normal auction system. If you want to deliver your eBook electronically, then it must be listed using the classified system.

The easiest way to determine if you need to use the classified listing method is this: If you have to physically send or mail the product to get it to your customer it can be listed like any other product on eBay.

If you do not have to physically deliver the product, if the product is transferred from computer to computer as the delivery method, then you must use the eBay classified system to list the product.

What Exactly Is An eBay Classified Ad?

Here is what eBay officially says about a classified ad:

Use Classified Ads to list items, services, or properties for sale in order to generate multiple leads. This format does not enable buyers and sellers to transact online through eBay nor is eBay Feedback available.

Classified Ads have the following features:

List your asking price. No bidding takes place.

Interested buyers fill out a contact form, and their information is sent to you.

List a phone number, and interested buyers can call you (optional).

List your item, service or property for a specific period of time.

Revise item-specific information at any time while the ad is active.

Here Is What An eBay Classified Ad Is In Plain English:

A classified ad is nothing more than the normal eBay type listing with two important differences, you do not do any direct selling on the eBay site and you must list your selling price.

How Is An eBay Classified Listing Like An eBay Auction Listing

- Both the classified and the auction listings can have identical descriptions.
- Both the classified and the auction listings will show up in keyword search results the same.
- Both the classified and the auction listings will show up in the assigned category the same.
- Both the classified and the auction listings can link to your about me page.

How Is An eBay Classified Listing Different Than An eBay Auction

- In an auction the transaction is conducted directly through eBay.
- With a classified ad, no transaction takes place on eBay.
- An auction can run from 1 to 10 days.
- A classified can run for 30 days.
- An auction has a listing fee based upon the starting price of the item.
- A classified ad has a fixed fee regardless of the price of the product.
- An action sale is subject to final value fees.
- A classified transaction incurs no final value fees.
- An auction allows both the buyer and the seller to leave feedback.
- A classified ad does not allow anyone to leave feedback.
- An auction cannot have an opt in box to collect names and email addresses.

- A classified ad can have an opt in box to collect names and email addresses.
- Classified ads can only be placed in certain categories.

Here is an Auction and a Classified ad side by side. You can see they are very similar and have the same overall look...

The major difference between Classified Ads and Auctions is that the transaction takes place off of eBay. eBay is not involved in the transaction.

Here is the bottom of an eBay auction. This is the area where the buyer places his bid through the eBay buying system. This part of a listing is not found in a Classified ad.

What You Will Need Before You Set Up Your Ad

You will need a PayPal account if you do not already have one. You can sign up for a PayPal account at paypal.com.

You will need to have your own website or a web address that can be used to store your eBooks online where your customers can download them. The best choice is to have your own website. This will allow you to do more selling and use eBay Classified ads in many different ways.

Your own website will allow you to maximize your profits. You will be able to upsell your customers and sell directly on the Internet

You will also need to be a registered seller on [eBay](#). Most likely you already have an eBay account. If not – simply go to the site, and follow the very simple signup process.

Classified Ad Categories

You can only use the Classified Ad listings in the following categories and subcategories:

CLASSIFIED CATEGORIES	
Websites and Businesses for Sale	Trade Show Booths
Banner Ads, Email, Online	Banner Systems, Signage

	Impressions, Ad Space

How To Search For Only Classifieds On eBay

If you want to look at some classified ads on eBay there is a way that you can create a search that will just find classified ads.

Go to eBay.com. From the home page, leaving the search box empty, click on the search button.

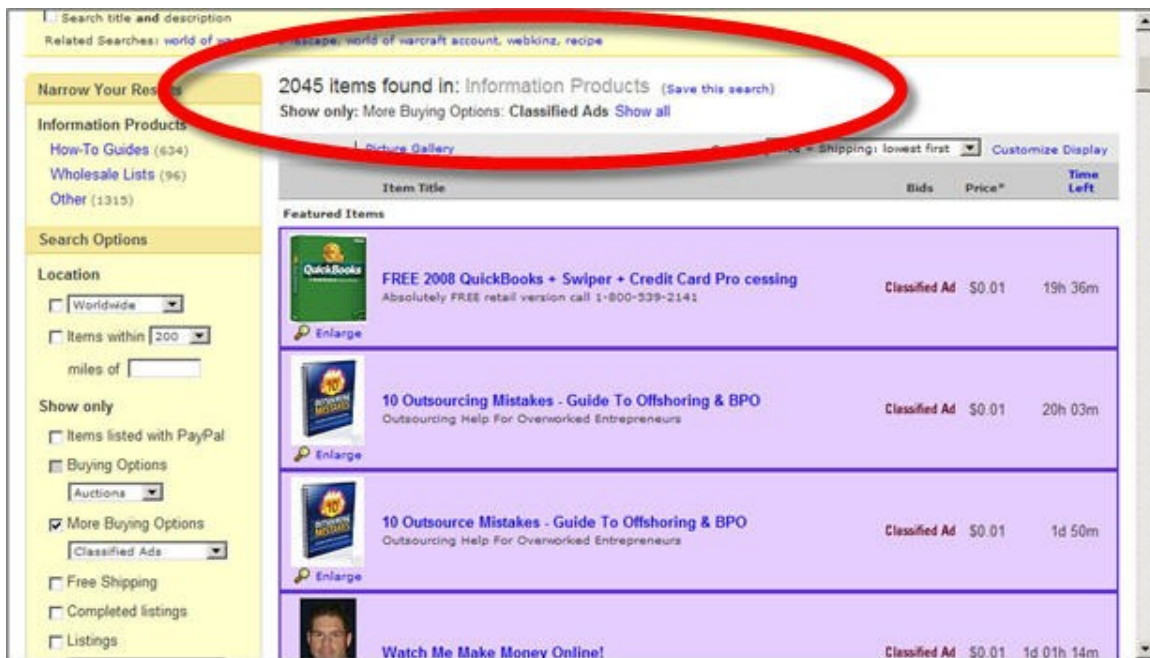

Another search page will appear with all the eBay categories listed. Under the format drop down box select Classified Ads. After selecting Classified Ads in the drop down format box, click the search button.

A list of all categories with the number of classified ads in each category listed in parentheses next to each category will be found. Categories with zero as the number of Classified ads in that category most likely are categories that do not allow Classified ads. Near the bottom of the category listing, under “Everything Else” you will find “Information Products” You can see in this example there are 2039 Classified ads listed in this category.

The search results will show a list of only classifieds in the information products category. In this search, 2045 classified ads were found.

How To List Your eBay Classified Ad Correctly

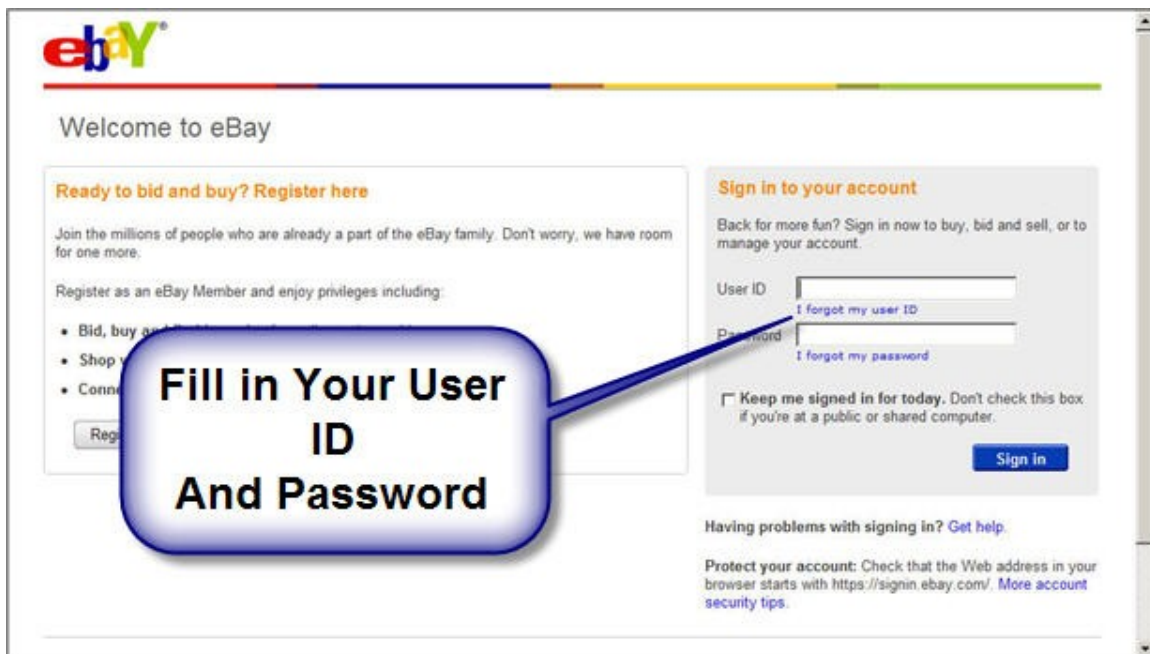

Step 1

Log in to your eBay account. (If you do not yet have an eBay account see the appendix for instructions on how to set one up).

From the eBay main page click the sign in button.

At the sign in screen fill in your ID and your Password.

The image shows the eBay sign-in page. At the top left is the eBay logo. Below it, the text "Welcome to eBay" is displayed. On the left side, there is a section titled "Ready to bid and buy? Register here" with a link to register. On the right side, there is a section titled "Sign in to your account". This section contains a "User ID" input field and a "Password" input field. A blue callout box with the text "Fill in Your User ID And Password" points to these two input fields. Below the input fields are links for "I forgot my user ID" and "I forgot my password". There is a checkbox for "Keep me signed in for today" and a "Sign in" button. At the bottom of the sign-in section, there is a link for "Get help" and a "Protect your account" section with a link to "More account security tips".

Fill in Your User ID And Password

Once you are signed in. Click the Sell button at the top right of the page.

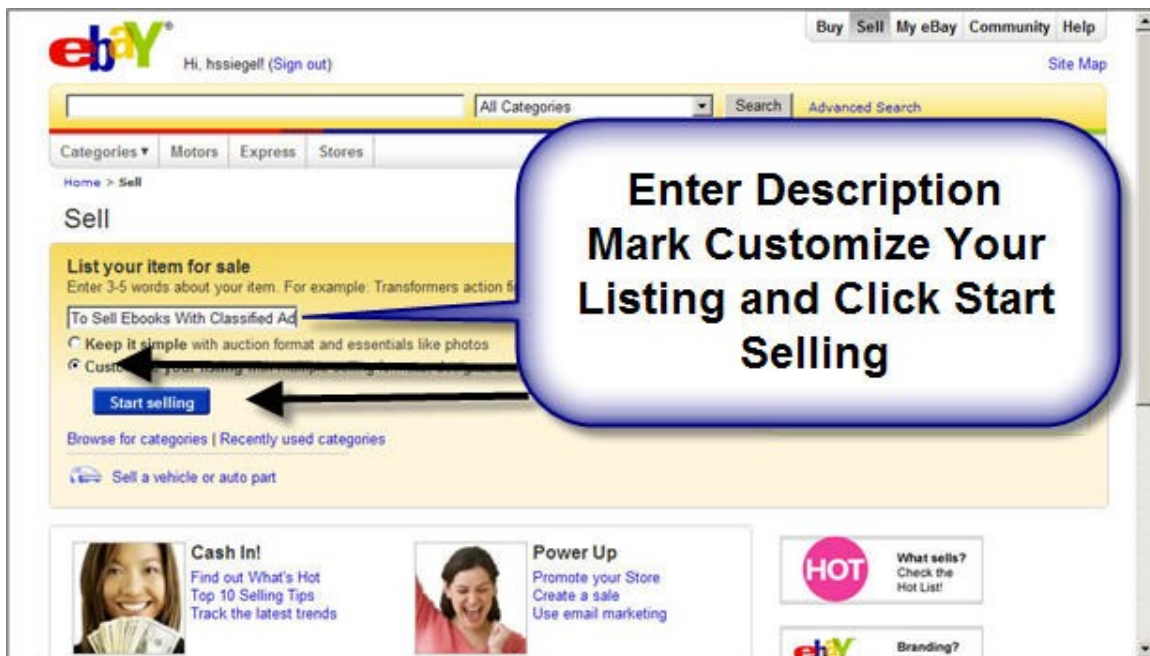

The image shows the eBay homepage. At the top right, there is a navigation bar with links for "Buy", "Sell", "My eBay", "Community", and "Help". A blue callout box with the text "Click The Sell Tab" points to the "Sell" link. Below the navigation bar, there is a search bar and a "Search" button. On the left side, there is a "Shop your Favorite Categories" section with a list of categories. On the right side, there is a "My eBay at a Glance" section with a "Selling (3)" tab. Below this, there are three items for sale, each with a "Buy it Now" button. At the bottom of the page, there is a "Don't just shop. Win!" section with links to "Visit the community" and "Visit the learning center".

Click The Sell Tab

Enter the description of your item or ad. This is not your title so you do not have to be concerned with keywords yet. Just put in a description so that you can identify which ad this is.

Click the customize button and then click the start selling button.

The next screen will ask you to select a category. This is mandatory. If you are selling eBooks then you should select the **EVERYTHING ELSE > INFORMATION PRODUCTS > OTHER** category.

If you ever place an ad for another type of item, you must make sure you pick a category that allows classified ads.

Once you have selected the category then click continue.

Help buyers find your listing by selecting a category that best describes your item

[Browse categories](#) [Search categories](#)

How To Sell Ebooks With Classified Ad

Categories

- ☐ Books > Nonfiction
- ☐ Everything Else > Information Products > How-To Guides > Self Employment
- ☒ Everything Else > Information Products > Other
- ☐ Books > Other
- ☐ Books > Textbooks, Education
- ☐ Everything Else > Information Products > How-To Guides > Self Employment
- ☐ Everything Else > Information Products > How-To Guides > Self Help
- ☐ Books > Fiction Books

Tip: Reach more buyers by selecting two categories. ([Fees apply](#))

Categories you have selected

- Everything Else > Information Products > Other | [See sample listings](#) | [Remove](#)

[Continue >](#)

Select Everything Else > Information Products > Other

And Click Continue

A second box will pop up asking you if you want to select another category. Click the NO THANKS button and then click the continue button. If you do select another category eBay will charge you double your fees.

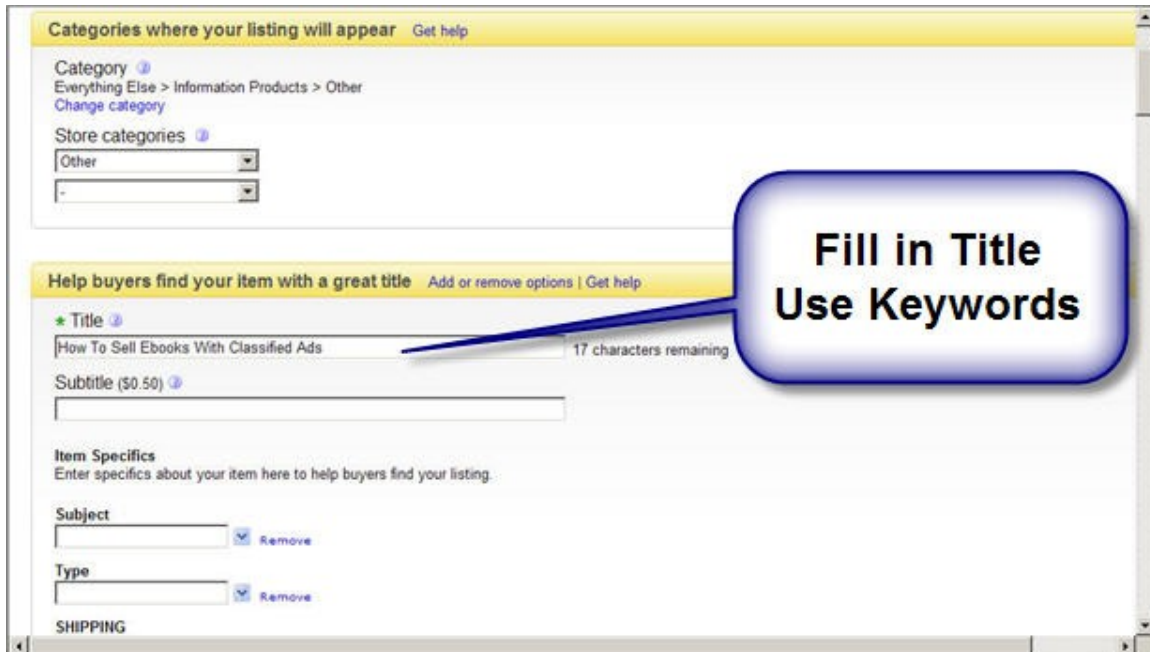

The next page is where you will fill in most of the details of your ad. First is your title. This is the most important part of your ad. Search results from the searches that your prospects do, will depend on how well you write your title.

You should develop a set of keywords that are searched on for your topic. Make sure you put as many of those keywords in your title as you can and still have it make sense. A great keyword tool I use and recommend is [KEYWORD ELITE](#). This actually helped me to achieve and maintain my Google.com No.1 Rankings from over 52 MILLION sites!

The title is also the entry that will show up in the search results. Your title, besides having keywords in it needs to be as attention grabbing as you can make it because your title will determine whether a potential customer clicks on it or not. Another AWESOME tool I strongly recommend is [GLYPHIUS COPYWRITING SOFTWARE](#) I actually

BUY additional licences of this software for my copywriters as the tool really can produce some KILLER results both on sales letters AND eBay listing titles.

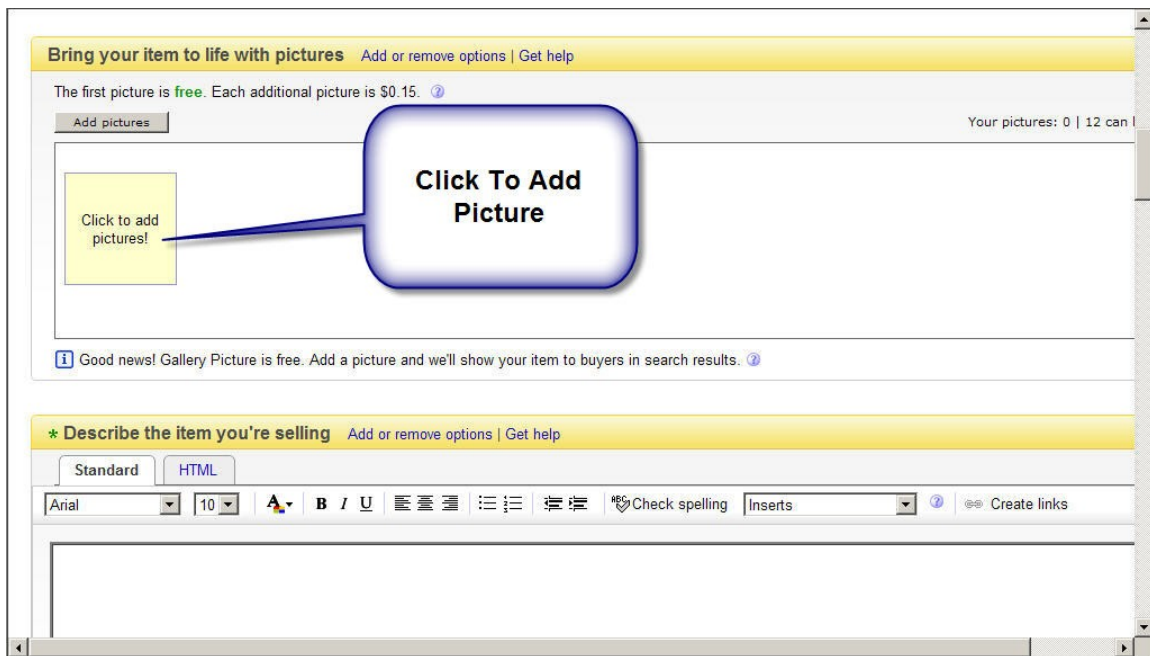

The image shows a screenshot of an eBay listing form. At the top, a yellow banner reads "Categories where your listing will appear" with a "Get help" link. Below this, the "Category" is set to "Everything Else > Information Products > Other", with a "Change category" link. The "Store categories" section shows a dropdown menu with "Other" selected. A blue callout bubble with a white border points to the "Title" field, containing the text "Fill in Title Use Keywords". The "Title" field itself contains the text "How To Sell Ebooks With Classified Ads" and shows "17 characters remaining". Below the title is a "Subtitle (\$0.50)" field. The "Item Specifics" section includes a "Subject" field with a "Remove" button and a "Type" field with a "Remove" button. At the bottom, the "SHIPPING" section is partially visible.

If you want to include a picture (Which I highly recommend) then scroll the picture area and click the add picture icon. The picture can be your eBook cover or it can be just a graphic with text designed to draw the customer's attention.

Great pictures entice the browser to click on your listing, so a professional eCover graphic is of paramount importance to your success. I know a place where you can get AWESOME designs for your eCovers. It's really affordable and you get 2 FREE Revisions if you are not 100% satisfied.

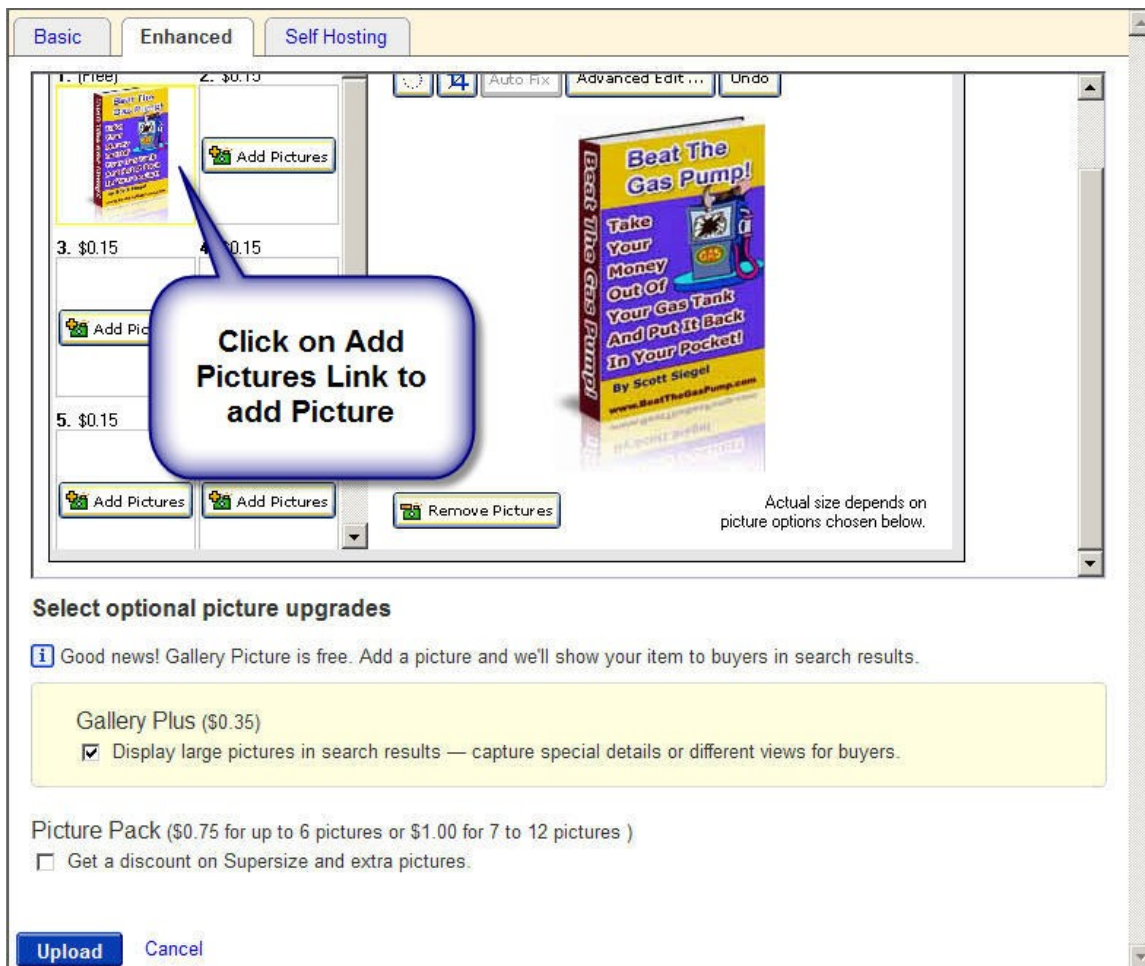

[CHECK THEM OUT HERE :\)](#)

When you click the add pictures icon, this screen comes up. This is where you will actually upload the pictures from your computer.

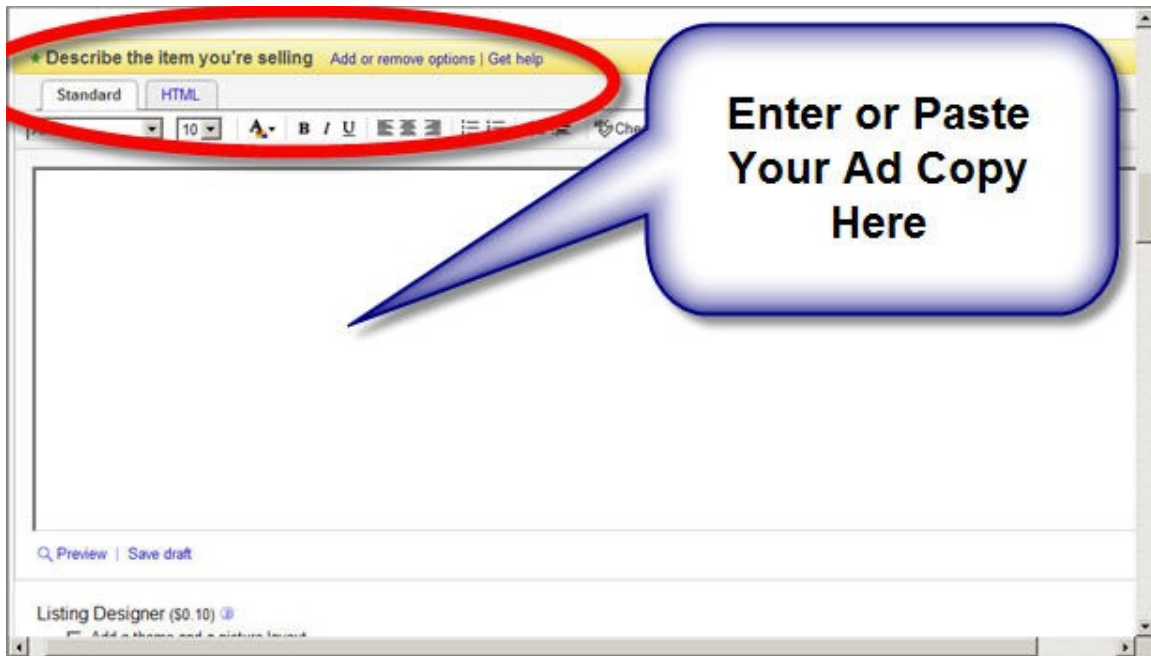

Click the add pictures in the first box and a dialog box will come up where you will tell the program where the picture is on your computer. Make sure you use the first box because it is free.

If you use more than one picture there will be additional fees. When you are done listing where the program will find your pictures click the upload button and the picture will show up in the boxes like below.

The next step is to scroll down to the description area and enter your ad copy. You can type it in and then use the editor to format it with font, font size, color, alignment and other options.

You can also paste your ad into the box if you have created the ad earlier off line. There is an HTML tab you can click if you are familiar with HTML and can enter or paste HTML code directly.

The next area you scroll to is where you tell eBay that you are placing a Classified Ad. Click on the classified Ad tab.

If you do not see a Classified Ad tab then you most likely selected the wrong category or a category that does not allow Classified Ads. If that is the case, go back and select the proper category.

Choose how you'd like to sell your item [Add or remove options](#) | [Get help](#)

**Big Upgrades, Big Savings**
Bold • Border • Highlight • Featured Plus! • Gallery Featured
\$34.95 (Save \$18.95)* [Add Now](#)

Good news! Gallery Picture is free. Add a picture and we'll show your item.

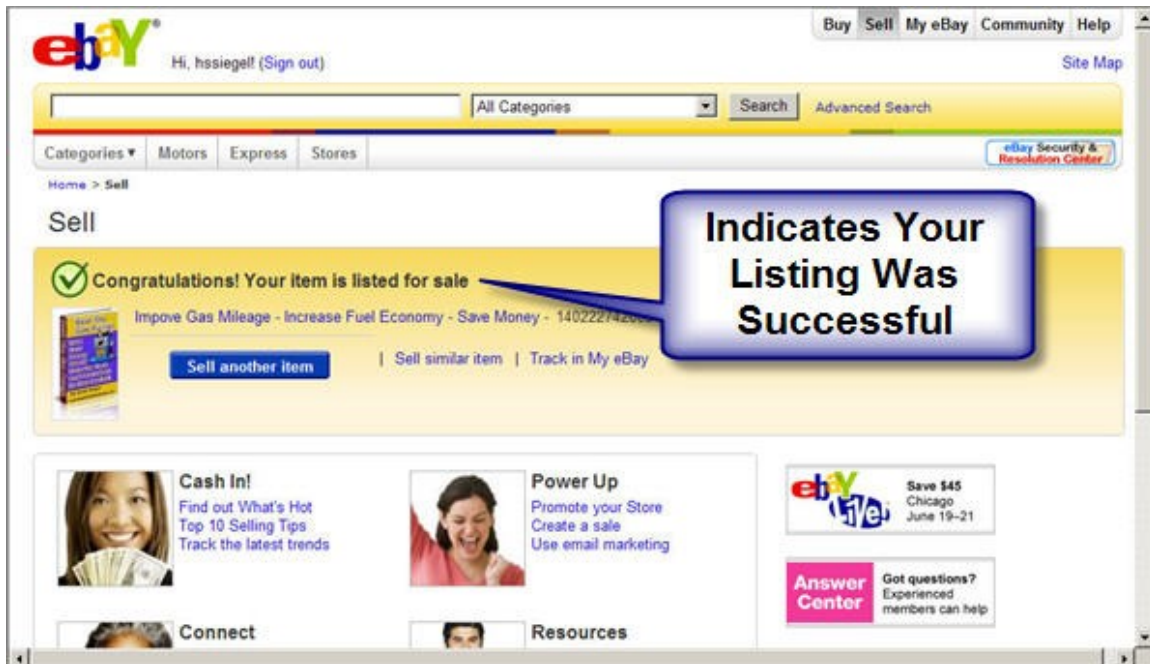

Gallery Plus (\$2.00) ⓘ
☐ Display large pictures in search results — capture special details or

Subtitle (\$0.50) ⓘ
☐ Give buyers more information in search results (searchable by item description)

Gift Icon ⓘ
☐ Promote your gift service with a  icon next to your listing in search results

Select any add on enhancements you want (\$\$) and Scroll to the bottom and Click Submit

After clicking the submit button you should be returned to this screen that says your item is listed for sale. If you see this screen then your listing is done and should be visible. If you don't see this screen, then you did something wrong and you need to go back and do it again. In most cases if you need to do it again the system will have saved your previous work. So hopefully you will not have to start over from scratch.

That is all there is to listing your ad.

You should be able to navigate to the ad by clicking the ad title on this page. You will then be able to see how your ad looks.

How To Use Classified Ads To Make Money

There are two main purposes to a Classified Ad. The first is to sell something. You do that using this system which has been approved by eBay:

(This system is explained FULLY in later chapters for you)

1. TRAFFIC TO CLASSIFIED AD
2. OPTIN BOX on CLASSIFIED AD
3. BUYER HAS TO CONTACT YOU TO ORDER
4. SEND SALESPAGE LINK TO BUYER
5. THEY BUY THRU PAYPAL DD-button
6. THEY GET EMAIL FROM DD SOFTWARE SAYING PRODUCT ON WAY

The second is to build a list. Each one requires different components to be part of your ad.

If you want your ad to sell an item directly then the easiest way to do that is to place an email address directly in the ad, eBay conveniently allow this.

If you want to use your ad to collect leads and build your customer list there is an easy way to do that too. You can place an [opt-in box](#) directly in your ad. Generally you would offer a free report, or a discount to another of your products. Your lead would fill in the opt-in box with their name and email or any other information you want to collect.

Once they fill in the box, they click the button and they are either sent an email with instructions on how to get the report or you can send them to a download page. In either case, once they have clicked the button on the form you have their information instantly added to your [autoresponder](#).

In order to do this, you do need to have an autoresponder. An autoresponder is an email system that collects names and automates emails to be sent to the list. This is a fundamental requirement if you are serious about making money online.

In the next sections the exact steps you need to take to add an opt-in form will be outlined.

How To Add An Opt-in Box To Your Classified Ad

One of the primary functions of an eBay Classified Ad is to generate leads. Leads are (or should be) the be all and end all of your business. A lead (or subscriber) is far more important than ANY sale you make.

Why? Well quite simply because a sale is a one time purchase from a customer. You may never ever see this customer again. Capturing the customers name and email address means:

1. You know their interests
2. You can build rapport over time with this customer
3. You can offer multiple products over time that you already KNOW they will be interested in – thus increasing the chances of more sales and profit for you..
4. You can turn this customer into an affiliate for you to sell even MORE of your products as a WIN-WIN situation.

None of this can be accomplished without having a mechanism for capturing email and name information from those leads.

An autoresponder is the mechanism used to maintain and use that information. An opt-in box is the specific method of gaining that information. It is more efficient to have an opt-in box right in your ad so you can collect that information right away rather than send the customer somewhere else and then collect the information.

Here are the steps you need to follow to put an opt-in box on your ad listing page. The example here uses an autoresponder called Autoresponse Plus. There are many different ones out there that you can use. Aweber and Get Response are two good ones.

The BEST autoresponder on the market, and the one I use the most and highly recommend is [AWEBER](#).

While the screens and link locations in this example will not be the same as those other responders, the steps and the actions you need to take will be the same. You just may have to hunt for the equivalent links and options on your autoresponder,

If you do not have an autoresponder – WHY NOT! It is the most important investment you will EVER make in your business bar none, seriously – so sign up TODAY.

The first step is to log onto your autoresponder account. Once logged on select the option that lists your autoresponders.

AutoResponse Plus Version 3.6.002

Special message from Neil Morgan, Creator of AutoResponse Plus
On May 1st 2008 I'm giving away a cool \$1,000 cash!

Start http://www.p... 3:36 PM

**Your Autoresponder May Look Different But The Steps Are The Same.
Links May Be In Different Places**

Select the Autoresponder and Click the Form Code Link

You will then have some options to check or uncheck. This will tell the autoresponder what information you want to collect. Usually name and email is used.

This process generates raw HTML code for your AutoResponse to copy and paste the code into your HTML editor to format it.

Any fields on your subscription form with names that contain {CUSTOM_phone default}, {CUSTOM_fax default}.

Example: Your phone number is {CUSTOM_phone unknown}

[Generate Code »](#)

Your Autoresponder May Look Different But The Same Steps Apply

Links May Be In Different Places

Check Off the Fields You Want in the Form

Once you select your options, then find the generate code button or link. Either somewhere on the page or on another page that opens up you will find a box that has some HTML code in it. That is the code for the button. Don't worry, you don't have to know HTML to use it and make it work. You just have to know how to cut and paste.

If you get stuck just email my Helpdesk and we'll be happy to help you out.

Select and Copy the Code Generated

If you read the steps to install a pay button, you will find these steps are exactly the same. Sign into your eBay account and select the revise your item option.

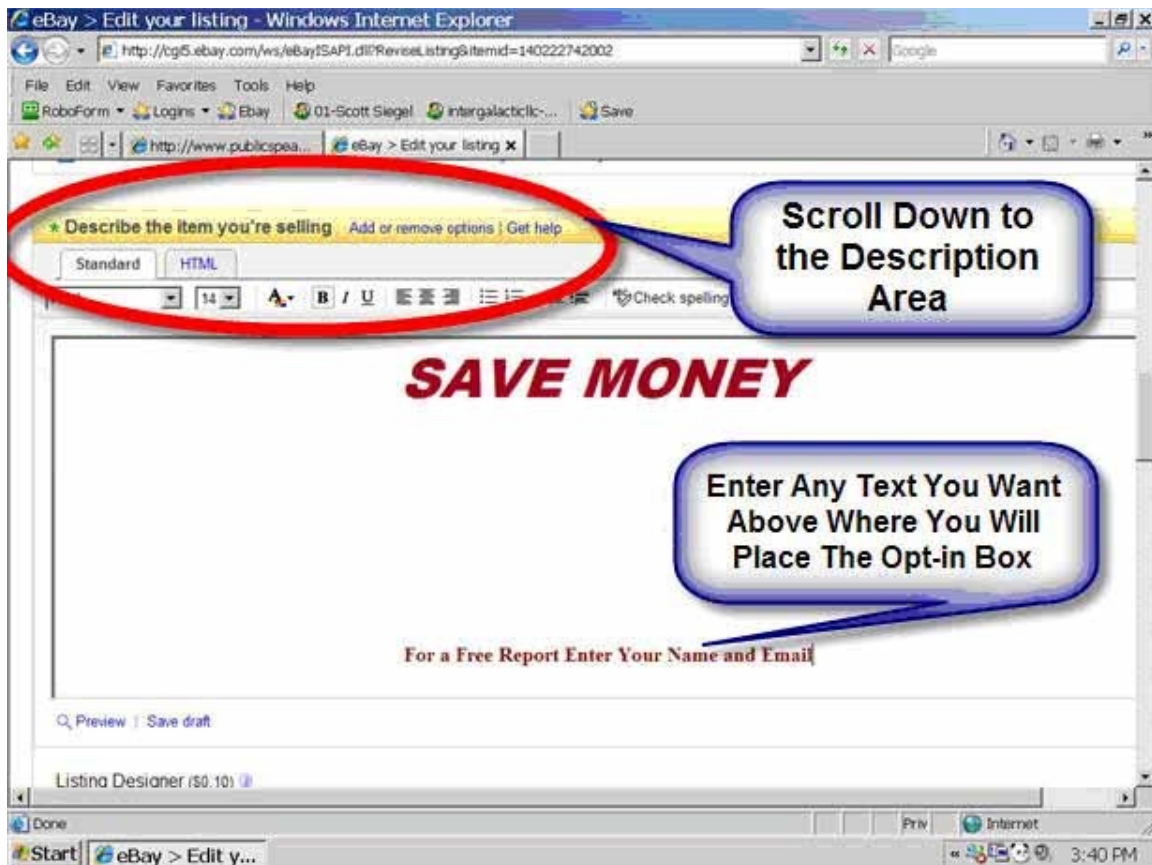

You will see a screen similar to the screen you used to set up the ad originally. Scroll down to the description area. Find where you want to put your opt-in box and enter any text you may want to put above it.

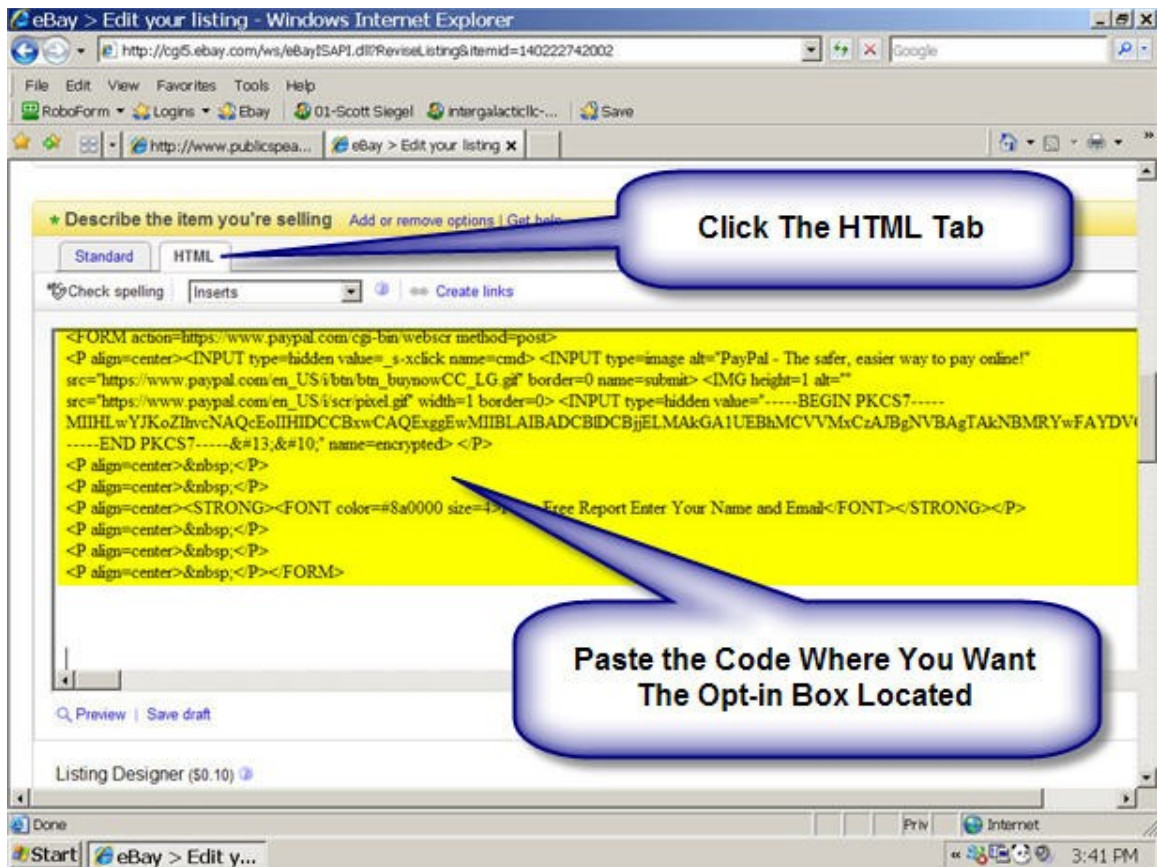

A good example would be:

GET YOUR FREE REPORT!

Just enter your name and email.

Click the HTML tab. You will see the HTML code for your ad. Locate where you want the opt-in box. Usually at the end, but if you search for the text you entered to be just above it, you will find the right place. Paste the code you copied to the clipboard from the autoresponder on a blank line under where your text is listed.

Now scroll down to the bottom of the page and click the continue button.

Additional payment methods ⓘ

You should be returned to a page like you saw when you created your ad. This one says: You've successfully revised your listing. If you did not get to this page, you have an error somewhere and may have to repeat the procedure.

Next navigate back to your ad by clicking the title on the page. You should see your ad. Scroll your ad and you should find your opt-in box.

You should test it by signing up yourself to see if it works properly...

That's all there is to putting your own opt in box on you Classified Ad page.

How To Link To Your About Me Page From A Classified Ad

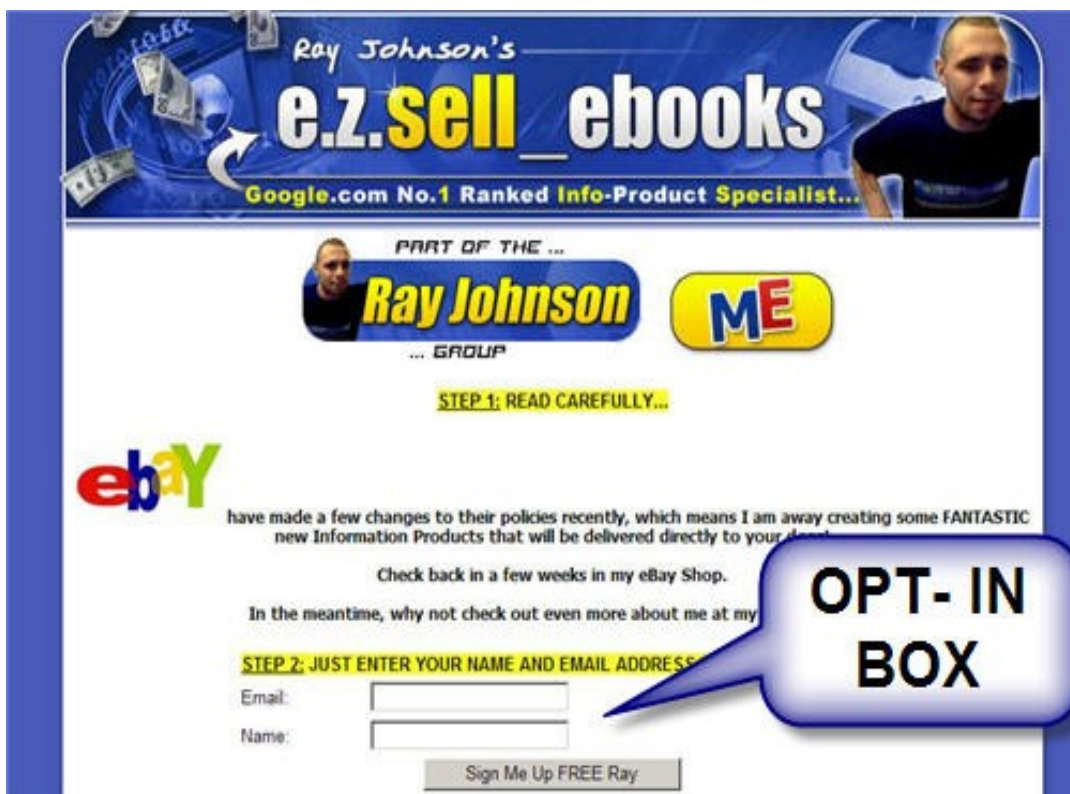

What Is an About Me Page?

An About Me page is a page that can be customized just about any way that you want. Every seller on eBay automatically gets an About Me page. Here is an example of my About Me page. As you can see I have customized it as a full graphical web page promoting my eBook business.

One of the advantages of using an About Me page is that this is the one area of eBay that external links are permitted.

That means you can put links to any of your websites on this page. You can also include an Opt-In box like the one shown here. The steps to putting an Opt-In box on your About Me page is very similar to putting one in your classified ad as I demonstrated earlier.

The image shows a screenshot of an eBay 'About Me' page for Ray Johnson. The header features a blue banner with the text 'Ray Johnson's e.z.sell ebooks' and 'Google.com No.1 Ranked Info-Product Specialist...'. Below this, there's a section titled 'PART OF THE ... Ray Johnson ... GROUP' with a 'ME' button. A yellow box highlights 'STEP 1: READ CAREFULLY...'. The main content area includes the eBay logo and a paragraph about policy changes. A blue speech bubble labeled 'OPT-IN BOX' points to a form with fields for 'Email:' and 'Name:', and a 'Sign Me Up FREE Ray' button. A yellow box highlights 'STEP 2: JUST ENTER YOUR NAME AND EMAIL ADDRESS'.

Another feature of the About Me page is the fact that you can place download links on this page which will allow your customers access to free reports by linking to a download page.

Google.com No.1 Ranked Info-Product Specialist...

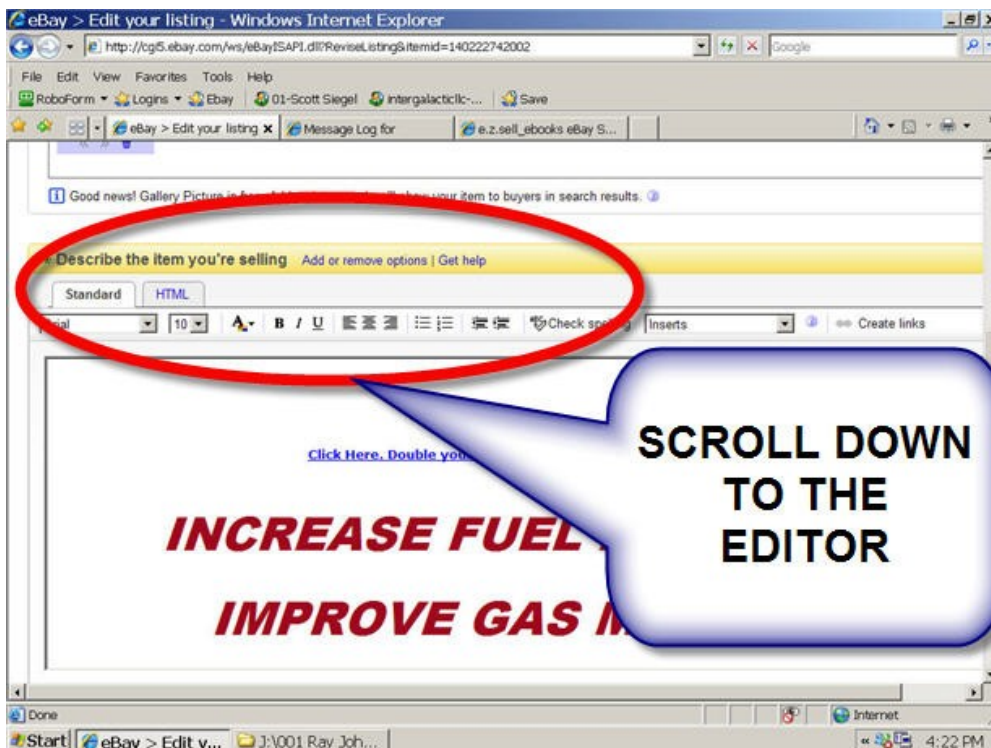

PART OF THE ... Ray Johnson ME

Start e.z.sell_eboo... J:\001 Ray Joh... Internet 4:20 PM

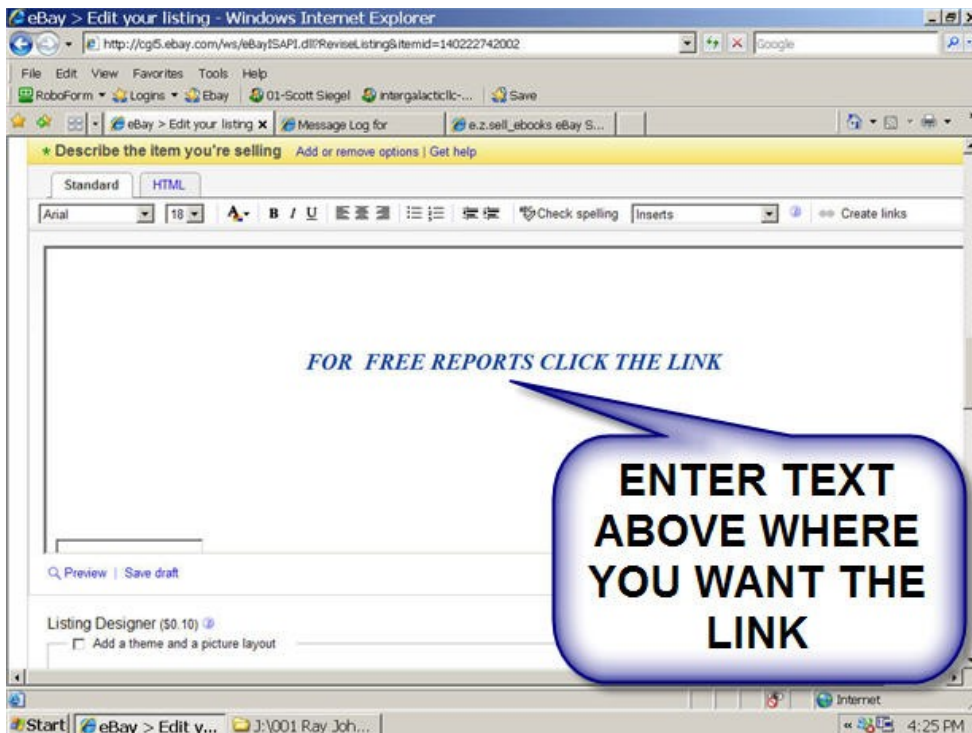

Log on to eBay and go to your Classified ad. Select revise your item.

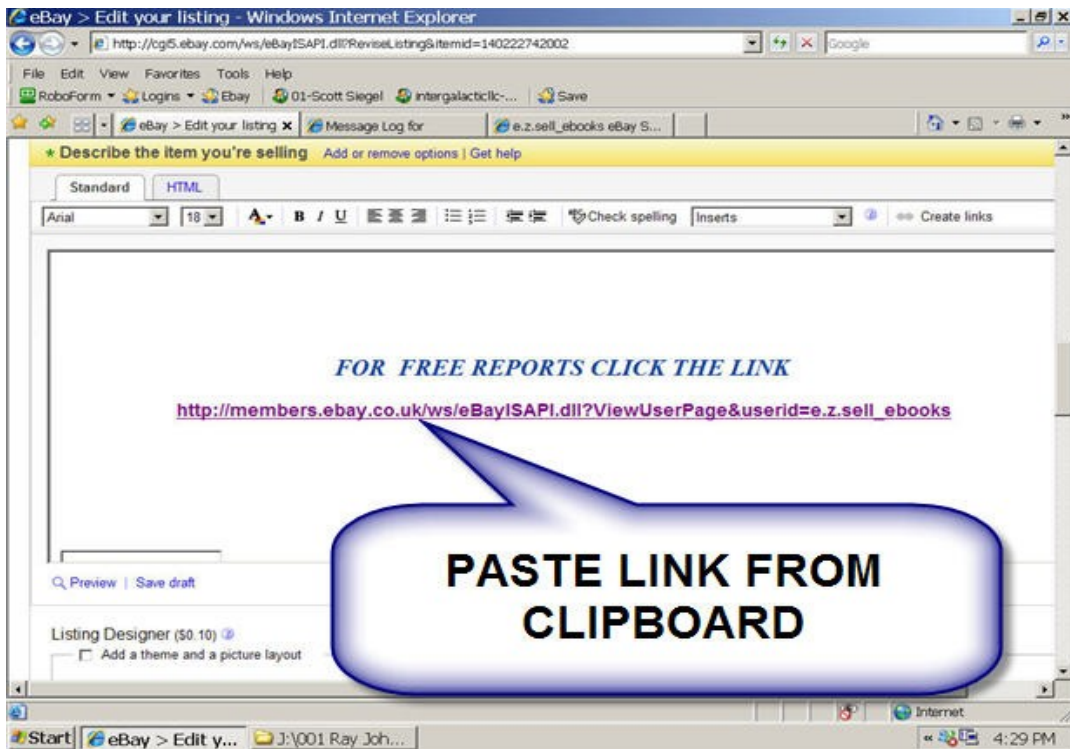

Scroll down to the ad copy editor.

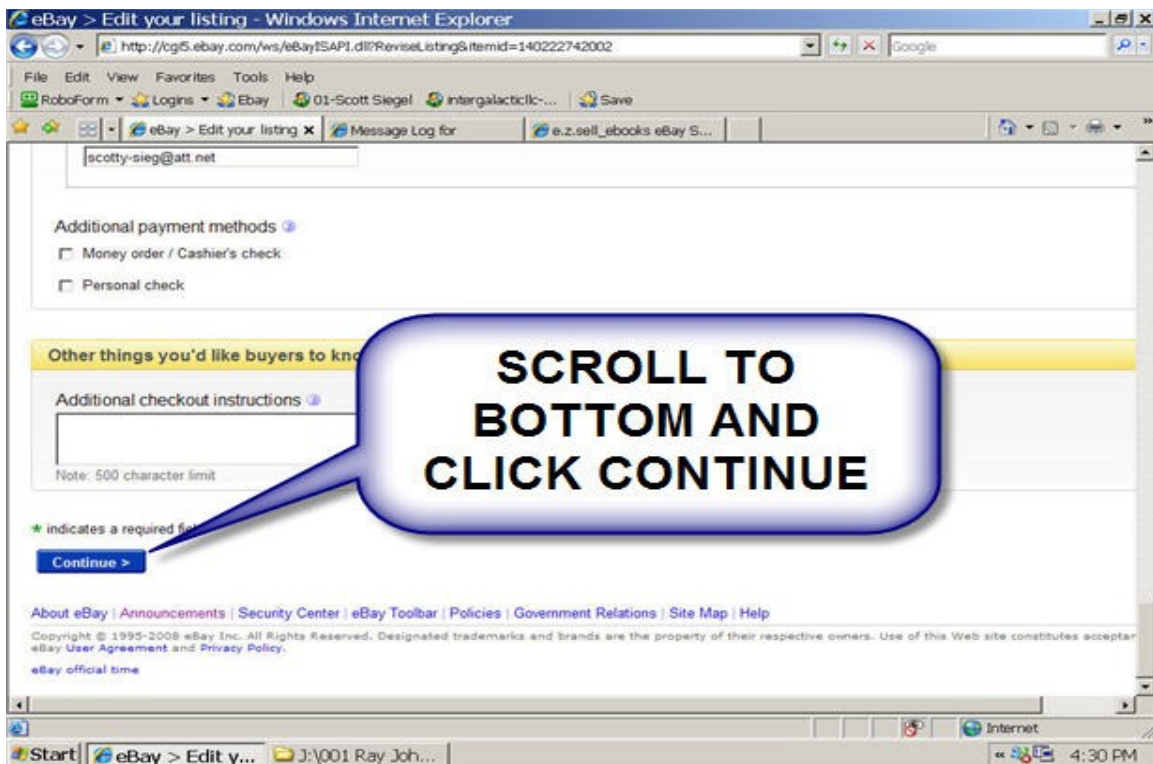

Enter text above the place in the ad where you want your link to be.

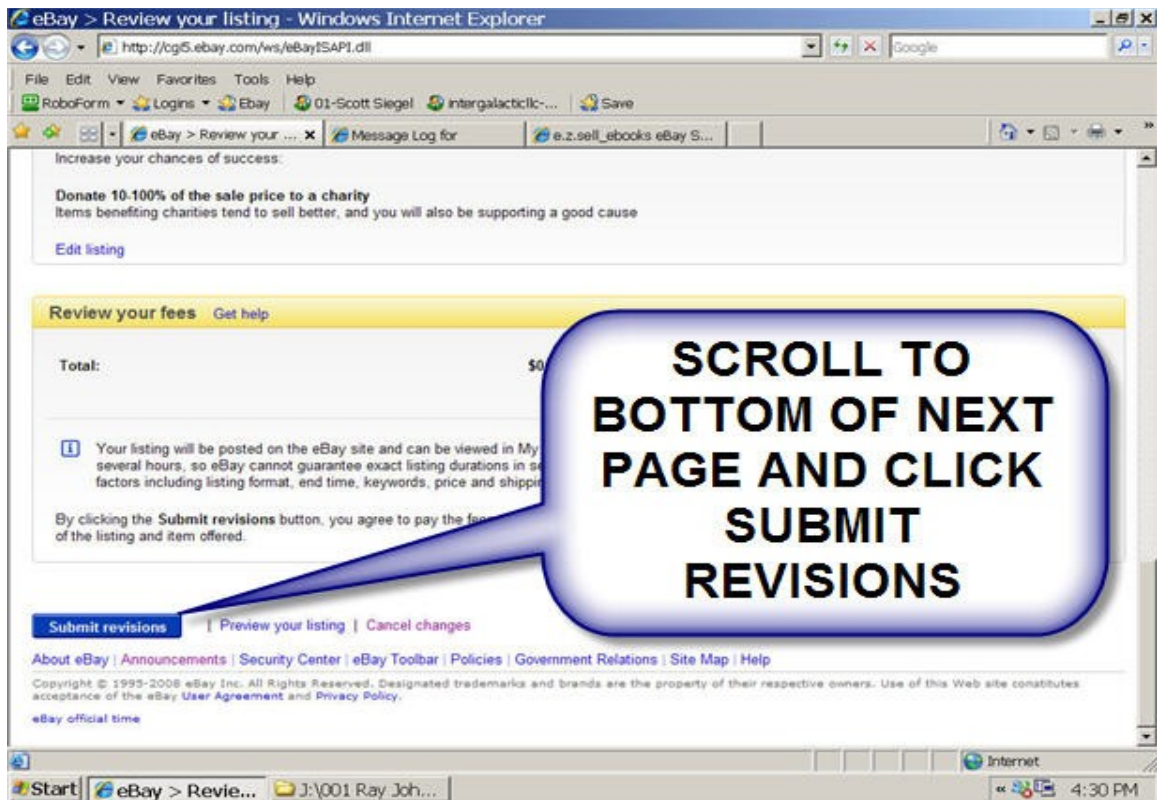

Under the descriptive text you just entered, paste from the clipboard the address you had copied from the About Me page. That will be the link back to the page.

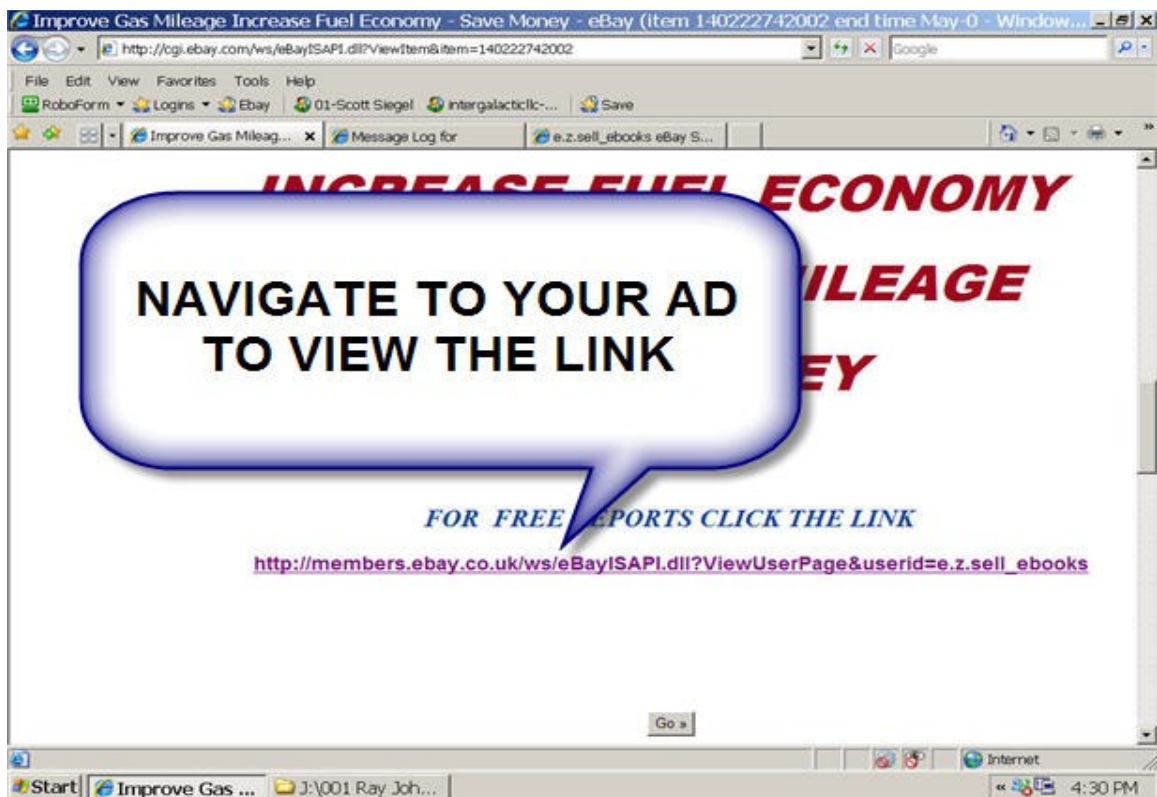

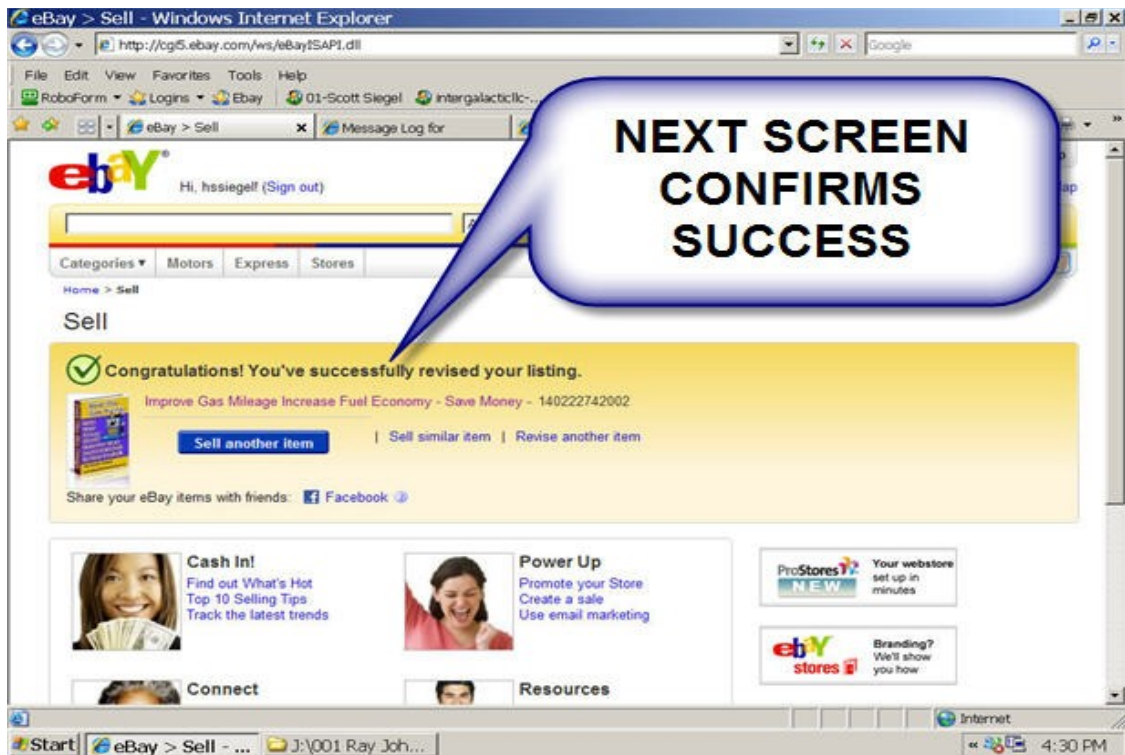

Then scroll to the bottom of the page and click the continue button.

Scroll to the bottom of the next page and click the submit revisions button.

The next screen should have a message showing that the revision was a success. Now click the link that leads back to your ad right under the success message to check for the link.

Your link should be on the page. Click the link to test it, and if all is working as it is supposed to, you will be taken to the About Me page.

An alternative method I have found to make money using your About ME page, is to offer discounts to the products that you have for sale IN your Classified Ads.

This way, you are linking to your website, and when the prospects clicks the discount link you can create on your ME page, they should be taken to an optin box offering the discount, in exchange for their name and email address.

How To Deliver Your Products...

Because the process of digital delivery is still allowed using Classified Ads, you will still need [Digital Delivery Software](#) to automate some of the sales process. (Just remember the system is no longer 100% automated).

In order to deliver your products to your buyer, you now have to wait for the buyers contact. eBay conveniently have included an “Email The Seller” link on ALL Classified Ad Listings so the process is seamless.

The only difference to the process now is you have to manually send the buyer to a simple purchase page with a BUY NOW button on it. You need to create a new page for EACH eBook you plan on selling. The page doesn't have to be a beautifully laid out, fancy page with lots of graphics – just a simple page with, with a title to identify the item for sale will be fine.

In this example I am talking about using [EW Portal](#) as the digital delivery script – because I have used it for years, but whichever delivery software you use, all you need do then is use your software to set up your item details such as the Item Name, Price, **and most IMPORTANTLY text area in your digital delivery script – which doubles up as the email that your customer receives from you after payment. (More on this in a moment).**

Here is the EW Portal admin panel.

The screenshot shows the PayPal Business Portal - Administration Panel login page. At the top, there is a PayPal logo and the text "EW Business Portal - Administration Panel". Below this, there is a section titled "Administrator Login". A message states: "Please enter your username and password in order to proceed." There are two input fields: "Username:" and "Password:". Below the password field, a green message says: "All access attempts are logged !!!". At the bottom of the login section, there are two buttons: "Login" and "Reset". The page has a blue header and footer with the text "EW". At the very bottom, there is a small copyright notice: "Powered by: EWE Business Portal v1.0.0.001 - All rights reserved."

Once logged in – you'll see the administration panel like this:

The screenshot shows the PayPal Business Portal - Administration Panel main dashboard. At the top, there is a PayPal logo and the text "EW Business Portal - Administration Panel". Below this, there is a navigation bar with links: "Statistics | Config | Accounts | Templates | Items | Pins | Links | IPN | Help | Log Out". The main section is titled "Live Statistics". A message states: "All statistics are in real-time and can be refreshed at the bottom of this page." Below this, there is a section titled "General" with the following information: "Software Version: Your current version of this software is v1.7", "Latest Version: The latest version currently available is", "Installation: Your copy is installed on www.ezsellebooks.com", "Environment: Operating under Apache/2.2.8 (Unix) mod_ssl/2.2.8 OpenSSL/0.9.8b mod_auth_passthrough/2.1 mod_bvlimited/1.4 FrontPage/5.0.2.2635", and "Live Status: Software status is LIVE and accepting ipn." Below the "General" section, there is a section titled "Database" with the following information: "IPN Records: There are 151 records in your ipn database. Displaying 100 records per page in descending order.", "Download Links: There are 9 links currently available. Displaying 100 links per page in descending order.", "Available Items: You have 115 items protected against paypal fraud. Displaying 100 items per page in ascending order.", "Authorized Accounts: You have 3 paypal accounts registered on this portal. Displaying 100 accounts per page in ascending order.", and "Affiliates: You have 120 affiliates reselling your products. Displaying 100 affiliates per page, ordering by balance."

You choose ITEMS from the navigation bar and begin to enter the information. As shown below.

In the example BELOW you'll see the item title, the item number and the price of the item you want to sell.

You must ensure that the VERY FIRST item you enter has an item number of 1001. I don't know why – but this is a requirement of the script. Every consecutive item you add, will obviously go up in value from there...

Add New Entry

Item Name: Required variable used in the anti-fraud cart system.

Item Number: Item number used for all paypal payment submissions.

Amount (\$): Value amount used for USD paypal payment submissions.

Amount (\$): Value amount used for CAD paypal payment submissions.

Amount (£): Value amount used for GBP paypal payment submissions.

Amount (€): Value amount used for EUR paypal payment submissions.

Amount (¥): Value amount used for JPY paypal payment submissions.

All affiliate commissions are based on the (\$) USD amount, regardless of payment currency!

Commission: Commission value amount you will pay your basic level affiliates for each sale.

Second Tier: Commission value amount you will pay your basic level second tier affiliates.

Commission A: Commission value amount you will pay your advanced level affiliates for each sale.

Second Tier A: Commission value amount you will pay your advanced level second tier affiliates.

Commission B: Commission value amount you will pay your super advanced level affiliates for each sale.

Second Tier B: Commission value amount you will pay your super advanced level second tier affiliates.

You can also use a % in the above commission and tier amounts. (i.e. 25%. The % symbol is required!)

Owner:
This is the real owner of a file or item and will restrict the owners affiliate account to display exclusively their own products. Please note that if one of your affiliates owns a product then they will receive the commission amount as set in the basic level. This item will also not be available to any other affiliate as it will be sold by you on behalf of the owner for a private profit share only basis!

Mailing List:
If you have created a mailing list then you can add the e-mail address of all purchasers who buy this item to that list. You are encouraged to categorize your lists as much as possible to ensure good market targeting. Every buyer will always be added to the default list but please ensure you have this feature enabled in the

Moving on, you DON'T need to enter any more info here (as shown) so scroll down your screen until you see the next section of the screen...

Delivery Method: Preferred item delivery method.

Subject: Subject e-mail to send with this file/item.

Body:

This email is powered by: ***YOUR AWESER AFFILIATE LINK HERE***

Dear eBay member: Many thanks for your purchase today from ezselebooks.

We appreciate you have a lot of choice and we respect your business and value your custom. First of all, if you are not completely satisfied with your purchase from us please LET US KNOW.

You will find below, the link you need to download your purchase, if you have any problems or questions, please let us know.

Regards

Ray Johnson
ezselebooks.

Below is the link to your purchase:

YOUR DOWNLOAD PAGE LINK GOES HERE

Body e-mail you will send with this file/item. Please be very careful if editing variable tags.

Search:

You'll see above, the Delivery Method – this is simply telling us that the script will send our product in the form of a download link.

The subject line is basically the email subject that your customer will receive AFTER making payment to you via Paypal.

The body, is the delivery email. Just like the old way of selling eBooks, we add our Autoresponder affiliate link, the thank you message and then the link to the product [DOWNLOAD PAGE](#) use mine as a template (more on download pages later).

When you have done this, you'll need to upload your product to the designated file storage folder in your portal. This can be found in the Configuration Menu of the Portal navigation.

When done, scroll to the bottom of your screen and enter the name of the file, and SAVE.

Next, to create the Paypal button, locate your item you just saved from the item admin area like so:

The screenshot shows the PayPal Business Portal Administration Panel. At the top, there's a navigation bar with links: Affiliates | Mailings | Sales | Customers | Store | Coupons. Below that is the PayPal logo and the text "EW Business Portal - Administration Panel". A secondary navigation bar includes: Statistics | Config | Accounts | Templates | Items | Pins | Links | IPN | Help | Log Out. The main section is titled "Item Management" and contains the instruction: "Here you can manage your items, create a new entry or generate paypal codes." Below this is a table titled "Protected Items".

No.	Item Number	Amount	Filename	Created/Modified	
You will see the CODE button here, in your Admin Panel as soon as you have added all the details in the item admin area.					
				10/28/06 - 07/27/07	Edit Delete Code EP
				11/04/06 - 07/27/07	Edit Delete Code EP
				11/04/06 - 07/27/07	Edit Delete Code EP
				11/04/06 - 11/05/07	Edit Delete Code EP
				11/05/06 - 07/27/07	Edit Delete Code EP
				11/05/06 - 07/27/07	Edit Delete Code EP
				11/05/06 - 07/27/07	Edit Delete Code EP
				11/05/06 - 07/27/07	Edit Delete Code EP
				11/05/06 - 07/27/07	Edit Delete Code EP

A red arrow points from the text "Click it, and scroll down on the NEXT SCREEN that follows and you will see the Paypal button code generated." to the "Code" button in the first row of the table.

After you click on CODE (above) you'll see another screen appear – simply scroll down to GENERATE, and the Paypal form code will be generated like SO...

The screenshot shows the "PayPal HTML Form Code" screen. On the left, it says "Form Code:". On the right, there is a text area containing the following HTML code:

```
<!-- Start Of PayPal Form Code -->
<form action="https://www.paypal.com/cgi-bin/webscr" method="post">
<input type="hidden" name="bn" value="EliteWeaverUK.BusinessPortal">
<input type="hidden" name="cmd" value="_xclick">
<input type="hidden" name="business" value="buyquick.now@ntlworld.com">
<input type="hidden" name="return" value="http://www.ezsellebooks.com/portal/completed.php?item=1002">
<input type="hidden" name="item_name" value="Ice Cream Recipes">
<input type="hidden" name="item_number" value="1002">
<input type="hidden" name="amount" value="0.01">
<input type="hidden" name="no_shipping" value="1">
<input type="hidden" name="cancel_return" value="http://www.ezsellebooks.com/portal/cancelled.php?item=1002">
<input type="hidden" name="no_note" value="1">
<input type="image" src="http://images.paypal.com/images/x-click-but01.gif"
name="submit" alt="Make payments with PayPal - it's fast, free and secure!"/>
</form>
<!-- End Of PayPal Form Code -->
```

Add this HTML code to the corresponding BUY NOW page. When you save and upload the page to your website, the Paypal button will become LIVE and function correctly.

Now when eBay buyers contact you, just direct your buyer to the link for the corresponding page for their item, they click on the BUY NOW button, and the [digital delivery script](#) takes over and automates the process of delivery to your customer.

[Dan Thompson](#) will install the EW Portal Software for you for a very low \$9.95 (if you are unfamiliar with installing scripts). Just click Dan's name above and an email window will open for you to email him to complete the install for you.

You can contact me via my Support Desk and I can get it installed for you. AFTER you buy EW Portal [HERE](#)

Bigger Back-End Opportunities...

Now, as I said earlier, the text that you add into the Item administration area of your DD script is very important. Just like the old way way used to deliver digital items to your customer we want to maximise the back-end income opportunity from every sale. On the download page it is important to include:

A STEP BY STEP layout on the page (e.g. STEP 1: Do This...)

OPTIN BOX to 'register the purchase' or capture the customers data :)

LINK to join your affiliate programme (click the link for the one I use)

UPSELL to a related Clickbank product

UPSELL to one of YOUR higher priced products (related if possible)

LINK TO A FREE brandable report (embedded with AFF links or your sites)

I am now going to explain the above steps in detail for you.

The reason we need to place steps to follow on the download page is that it has been proven that people “feel-good” when they COMPLETE a task successfully and fully. If we make steps a requirement, then we CONTROL what the customer DOES and the actions they take.

This makes it easy for the customer to get on our subscriber list, and view our further offers – BECAUSE WE TOLD THEM TO!

We next need to set up an [optin box](#) to obviously allows us to build relationship with the customer over time. The best way to do this is to get the buyer on a buyers list, which you need to set up in [Aweber](#) or your own autoresponder. This 'buyers list' tells you that the people on this particular list will spend money on your products.

You should think about setting up sub-lists relating to different niches dependent on the products you are selling as this ensures the your buyer becomes a prospect for further targeted offers that you can promote to your list at a later stage, maximising the chance of further back end sales you make.

Next on the list of steps is your [Affiliate Programme](#). It is important to place it in this position on the download page, as firstly, we want to maximise YOUR business (as the seller). We have already gotten the customers details captured by our optin form – so we now know that potentially we have a customer for life, so before delivering the product, we should remind the customer that they can either make the money they just spent on our eBay listing back IMMEDIATELY, and MAKE MONEY from us in the future.

Use this text template as an example:

STEP 2: “Join my affiliate programme NOW and make the money you spent on your eBay purchase back INSTANTLY by simply promoting my products... You can also make huge commissions in future! All the tools are provided for you inside and it takes just seconds to join! [CLICK HERE](#)”

You will now find that your affiliates INCREASE and the impressions of your affiliate banners and links INCREASES *over time* – thus ultimately earning you more money. This may be something that you want to test.

Next we should add a step to UPSELL a related [Clickbank](#) product simply because:

- a) the product is targeted to the buyers interest.
- b) the product delivery and support issues are handled by [Clickbank](#) and the product owner.
- c) your affiliate payments are securely managed – you'll ALWAYS get paid for your efforts.

A great tool I strongly recommend to integrate Clickbank products with your download pages is Ray La Foy's ["Img-Ads"](#).

It uses a similar concept to AdSense, but uses images of products in the Clickbank Marketplace. You will see your Clickbank Affiliate Cheques grow using this, as images are proven to convert better than text, MEANING that your customer will click-through to the Clickbank product and should go on to make the purchase.

I have had great success with Img-Ads and you really can too, this is one of the TRULY great products there that actually delivers.

[Check out Img-Ads HERE](#)

The next step if it is applicable to you, is to promote one of your OWN products if you have one. The reason? Getting as many of your prospects interested in what you do OFF eBay is KEY to building strong foundations of your business over time. Remember – what if eBay suddenly disappears? You are left high and dry with no business, everything you will have worked to build will be gone in the blink of an eye! The recent change in eBay policies should be enough to cement that in your head!

Finally include a link to a FREE “brandable report/eBook can be given away by your customer. A good example of this could be a FREE “Leaked Chapter” of one of your own eBook based products – OR any related report that you can re brand – allowing you to put some of your OWN affiliate links into the report - AND allowing your customer to ALSO add some of THEIR affiliate links too.

You BOTH win, this is why Viral eBooks/reports can be so powerful.

The best branding tool on the market that I currently use and recommend is [ViralPDF.](#)

Remember, eBay Classified Ads can be highly powerful lead generation tools, they will create much bigger back end opportunities if correctly used as lead generators.

Test a classified over time, tweak it, compare it to a second similar ad and see which brings in the most subscribers for your business. This is known as basic A-B Split Testing and is absolutely critical to your success.

When you get the formula right, (when you see a steady influx of subscribers/sales daily – you just scale up the amount of eBooks you are selling.

This should instantly DOUBLE your results. You then simply rinse and repeat the entire process for EVERY new eBook you list on eBay using Classified Ad format.

I use a script called Stuffed Tracker from StuffedGuys.com for all my testing and HIGHLY recommend that you invest in it.

Alongside your Autoresponder and Digital Delivery Software, it is the best investment you'll ever make for your business.

Remember – if you DON'T know your numbers you DON'T know your business!

And Finally...

Remember, this new eBay policy change really will be the kickstart to a new way of selling information, using Classifieds Ads we can now generate more leads, make more money and generally build a business OFF eBay.

This is a really critical factor of your success. When this new eBay policy came into affect, so many sellers were instant in thinking that their eBook business was finished. WRONG. All these people who thought this way had their businesses set up wrong from the start!

This is why the new rulings will make a lot more people, a LOT more savvy in their business. Thanks eBay!

Remember, knowing your numbers in ANY business is key – so test and tweak till you find what brings the best results for you. There is no reason why a classified Ad can't generate 1000's of leads for your business, find the formula and then simply scale it up by running multiple Classifieds for MULTIPLE profits!

Custom Professionally Designed eBay Listing Templates By Ray Johnson Online Design

As I said earlier, making an impression on your customer is of paramount importance, this is why my own personal eBay adverts are so good. You too, can have INSTANT eBay templates like mine by visiting my professional graphic design website.

My templates are made with Professional graphic design software and will really help catch your customers eye, so that they remember your eBay Shop and then the potential is there for them to re-visit you, and spend their cash with you again and again.

I have made sure, my prices are the LOWEST around and include:

FULL eBay ADVERT TEMPLATES – The “canvas” on which you will advertise your product.

FLASH BANNERS – Eye-catching animated advertising banners to really catch your customer’s eye. **Take a look at mine [HERE](#)**

eBook COVER BOXES - Make your eBook LOOK like a package on a shelf in your shop (a VERY important element)

PROFESSIONAL QUALITY LOGO'S – Your business NEEDS a “Brand” which your customers will grow to recognise.

Buying a complete template from me will save you LOTS of time, and is a one time investment as you can also use this template for EVERY eBay advert you create.

INSTANT PROFESSIONAL LOOKING TEMPLATES WITH NONE OF THE HASSLE...

So that pretty much wraps it up... but not quite...

Ray Johnson Mentoring

This really could be your lucky day.

As most of my business is automated these days, and I have a lot more FREE TIME, I am currently offering you a golden opportunity to maximise YOUR earnings.

I am offering YOU, LIVE PERSONAL ASSISTANCE where YOU HAVE INSTANT ACCESS TO MY KNOWLEDGE FOR A FULL 12 MONTHS.

We can personally talk 1-2-1, I will get to understand your goals and develop your business to GUARANTEE you will succeed.

If you choose to join me we will cover this entire eBook in detail to make sure you understand everything, plus we will cover all of the following information which IS REQUIRED OFF eBay to succeed.

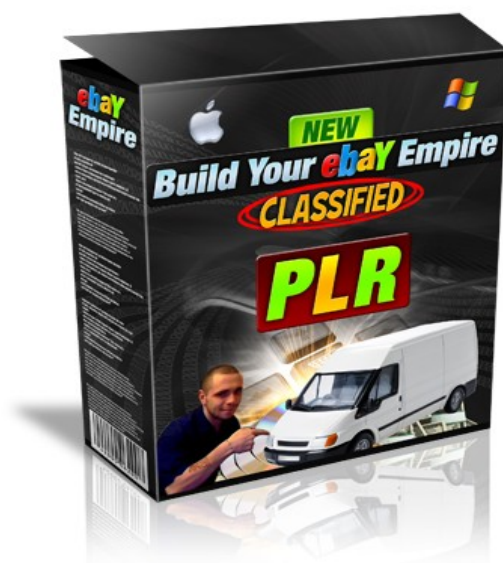

FOR ALL THE INFORMATION, CLICK [HERE](#)

*If this offer is slightly over and above your budget, did you know that YOU can become the author of Build Your eBay Empire “Classified” and resell this very guide on eBay, Clickbank, AND your website?

This is called PLR, or Private Label Rights which means that you can create your very OWN product in an INSTANT, generating huge profits WITHOUT:

Researching the market – Preparing the product – Writing the content in the product - Testing the product – Launching the product and more...

Take a look at Build Your eBay Empire “Classified” PLR below:

CLICK THE IMAGE ABOVE TO BE TAKEN TO YOUR DISCOUNTED OFFER

This is a truly amazing offer, have a serious think about purchasing, and you **WILL** see your profits skyrocket. That I guarantee. How do I know this?

Well, you paid me for this eBook didn't you? Thousands of people on eBay and the Internet will do the same for you.

I hope you have enjoyed reading this guide, and I invite you to leave a testimonial for the guide, not only to share your thoughts and to help me improve the guide – BUT to give YOU some exposure on the Internet

If you leave a testimonial for this guide, you can include your photo (optional), a LINK to your website or eBay Store, and an optional VOICE MESSAGE!

To send your testimonial click [HERE](#)
