Come Along My Friend And Let Me Tell You More!

Hello! My name is Peter Drew. You may know me from one of my several internet marketing (IM) products or websites, or, perhaps this report fell into your hands because someone thought enough of you to pass it along. Either way I'm glad you're here because I want to share with you some strategies and ideas about my latest project.

I've built many products that help people earn money online. And there are a lot of folks out there who have made money and will continue to make money with those products. But until now I've been mostly in the "tool" market – selling picks and shovels to gold miners. However, with my newest creation – www.TheArticleSense.com – that's about to change in a big way. And I want to show to you how you can use The Article Sense system to develop multiple streams of internet income on auto-pilot. So come along for a few minutes and let's explore The Article Sense System.

What is Article Marketing?

So, what is article marketing and why should you care about it?

Well, simply stated article marketing is taking an original or re-written piece of content and submitting that content to various places across the web in hopes of gaining back links to a website. We all have figured out that the search engines love good content and they love links so article marketing is an easy way for most folks to make a dent into market for user traffic on the world wide web.

Making Your Content Work For You

If you aren't currently using articles as part of your online marketing strategy, then you might be asking yourself, "Why should I care?". Well, to put it simply, if you aren't using this as part of your traffic strategy you are passing on an easy way to get targeted traffic to your websites.

Let's take a look at how this generally works. You have a website about puppies that you've worked hard to build. Now you need traffic to your site. Well, as mentioned above we know the search engines love good content. So, one thing you can do is write, or have written, great articles that tell about how to groom, feed, and care for puppies. Well, that only takes you so far because while you have good content – that's only one part of the whole equation.

Now, let's say you take another article and you submit it to a site such as EzineArticles.com and they accept it. Now you've also provided more good content about your site as well as given yourself a back link. And we all know how the search engines love those back links. So, by taking the time to write and submit a few articles you can generally generate enough traffic to your website to make it profitable.

This scenario has been going on for many years now and is still a very effective way to generate traffic to a website. But if you're one of the ones who have been submitting all of these articles for all of these years you have to have asked yourself at least once: What's in it for these places like EzineArticles.com?

An Idea Begins To Grow

If you've ever gone to a site like EzineArticles.com or any of its contemporaries then you've probably seen that when you click on an article you see multiple blocks of Google's AdSense staring you in the face. This is one avenue that these sites use to make money. They are counting on you to contribute content to them. You get your article distributed and get backlinks to your site – they get to run ads and keep the revenue for your hard work.

Of course, this is hardly anything new.

For quite some time some of us have noticed a trend among the top trafficked sites on the web. Take a look if you will at 8 of the the top 10 rated sites by Alexa: Yahoo!, Google, Myspace, YouTube, Facebook, MSN, eBay, Live, Wikipedia, and craigslist.

What do these sites have in common? The biggest trend I can see is that they all rely on USER generated content! The users become part of a community by blogging, giving reviews, posting video, etc. They share in the experience of that site instead of just viewing.

This very idea of being able to interact, of having users create your content for you is one of the reasons the article sites are thriving. And that is why The Article Sense will take that model to a whole other level.

You see I belong to an exclusive club. No, it's not a club that you join or where you go play golf. It's a lifestyle club. I belong to a group that has set and met goals. We work when we want and we play when we want.

My life is one that I wouldn't trade for anything. It's really nice being me.

And honestly I don't say these things to make you feel bad. I just want you to know that there is another way. You don't have to play the hand you've been dealt.
